AKAMAI TECHNOLOGIES, INC.
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Nature of Business and Basis of Presentation

Akamai Technologies, Inc. (the “Company”) provides cloud services for delivering, optimizing and securing online content and business applications. The Company’s globally distributed platform comprises more than 175,000 servers in over 1,300 networks in over 100 countries. The Company was incorporated in Delaware in 1998 and is headquartered in Cambridge, Massachusetts. The Company currently operates in one industry segment: providing services for delivering, optimizing and securing online content and business applications over the Internet.

The accompanying interim consolidated financial statements are unaudited and have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information. These financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany transactions and balances have been eliminated in the accompanying financial statements.

Certain information and footnote disclosures normally included in the Company’s annual audited consolidated financial statements and accompanying notes have been condensed in, or omitted from, these interim financial statements. Accordingly, the unaudited consolidated financial statements included herein should be read in conjunction with the audited consolidated financial statements and accompanying notes included in the Company’s annual report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission on March 2, 2015.

The results of operations presented in this quarterly report on Form 10-Q are not necessarily indicative of the results of operations that may be expected for any future periods. In the opinion of management, these unaudited consolidated financial statements include all adjustments, consisting only of normal recurring adjustments, that are necessary for a fair statement of the results of all interim periods reported herein.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (“FASB”) issued updated guidance and disclosure requirements for recognizing revenue. The new revenue recognition standard provides a five-step analysis of transactions to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance is effective for us on January 1, 2017. However, in April 2015, the FASB proposed deferring the effective date for one year. This guidance may be applied retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. We are evaluating the potential impact of adopting this new accounting guidance.

In April 2015, FASB issued updated guidance that will change the current presentation of debt issuance costs on the balance sheet. This new guidance will move debt issuance costs from the assets section of the balance sheet to the liabilities section as a direct deduction from the carrying amount of the debt issued. The guidance will be effective for the Company on January 1, 2016. The Company will reclassify its debt issuance costs included in other assets on the consolidated balance sheet to convertible senior notes within the liabilities and stockholders’ equity section. The amount of deferred financing costs expected to be reclassified as of January 1, 2016 is \$6.2 million. This revision will have no impact on the Company’s results of operations or cash flows.

2. Fair Value Measurements

The following is a summary of available-for-sale marketable securities held as of March 31, 2015 and December 31, 2014 (in thousands):

	Amortized Cost	Gross Unrealized		Aggregate Fair Value	Classification on Balance Sheet	
		Gains	Losses		Short-Term Marketable Securities	Long-Term Marketable Securities
As of March 31, 2015						
Commercial paper	\$ 10,492	\$ 1	\$ —	\$ 10,493	\$ 10,493	\$ —
Corporate bonds	931,055	1,383	(263)	932,175	314,352	617,823
U.S. government agency obligations	239,408	146	(27)	239,527	55,883	183,644
	<u>\$ 1,180,955</u>	<u>\$ 1,530</u>	<u>\$ (290)</u>	<u>\$ 1,182,195</u>	<u>\$ 380,728</u>	<u>\$ 801,467</u>
As of December 31, 2014						
Certificates of deposit	\$ 39	\$ —	\$ —	\$ 39	\$ —	\$ 39
Commercial paper	10,487	—	(2)	10,485	10,485	—
Corporate bonds	1,077,387	454	(2,132)	1,075,709	424,777	650,932
U.S. government agency obligations	303,808	20	(427)	303,401	84,380	219,021
	<u>\$ 1,391,721</u>	<u>\$ 474</u>	<u>\$ (2,561)</u>	<u>\$ 1,389,634</u>	<u>\$ 519,642</u>	<u>\$ 869,992</u>

During the first quarter of 2015, the Company began offering certain qualified individuals the ability to participate in a non-qualified deferred compensation plan. The investments held by the Company that are associated with this plan are classified as restricted trading securities. These securities are not included in the available-for-sale securities table above, but are included in marketable securities in the consolidated balance sheets.

Unrealized gains and unrealized temporary losses on investments classified as available-for-sale are included within accumulated other comprehensive loss in the consolidated balance sheets. Upon realization, those amounts are reclassified from accumulated other comprehensive loss to interest income in the statements of income. As of March 31, 2015, the Company holds for investment corporate bonds with a fair value of \$44.3 million, which are classified as available-for-sale marketable securities and have been in a continuous unrealized loss position for more than 12 months. The unrealized losses are insignificant and are attributable to changes in interest rates. The Company does not believe any unrealized losses represent other than temporary impairments based on the evaluation of available evidence. As of December 31, 2014, there were no securities in a continuous unrealized loss position for more than 12 months.

The following table details the fair value measurements within the fair value hierarchy of the Company's financial assets and liabilities at March 31, 2015 and December 31, 2014 (in thousands):

	Total Fair Value	Fair Value Measurements at Reporting Date Using		
		Level 1	Level 2	Level 3
As of March 31, 2015				
<i>Cash Equivalents and Marketable Securities:</i>				
Money market funds	\$ 872	\$ 872	\$ —	\$ —
Commercial paper	12,493	—	12,493	—
Corporate bonds	932,175	—	932,175	—
U.S. government agency obligations	239,527	—	239,527	—
Mutual funds	387	387	—	—
	<u>\$ 1,185,454</u>	<u>\$ 1,259</u>	<u>\$ 1,184,195</u>	<u>\$ —</u>
<i>Other Liabilities:</i>				
Contingent consideration obligation related to Velocius acquisition	\$ (900)	\$ —	\$ —	\$ (900)
As of December 31, 2014				
<i>Cash Equivalents and Marketable Securities:</i>				
Money market funds	\$ 501	\$ 501	\$ —	\$ —
Certificates of deposit	39	39	—	—
Commercial paper	10,485	—	10,485	—
Corporate bonds	1,075,709	—	1,075,709	—
U.S. government agency obligations	303,401	—	303,401	—
	<u>\$ 1,390,135</u>	<u>\$ 540</u>	<u>\$ 1,389,595</u>	<u>\$ —</u>
<i>Other Liabilities:</i>				
Contingent consideration obligation related to Velocius acquisition	\$ (900)	\$ —	\$ —	\$ (900)

As of March 31, 2015 and December 31, 2014, the Company grouped money market funds, certificates of deposit and mutual funds using a Level 1 valuation because market prices for such investments are readily available in active markets. As of March 31, 2015 and December 31, 2014, the Company grouped commercial paper, U.S. government agency obligations and corporate bonds using a Level 2 valuation because quoted prices for identical or similar assets are available in markets that are inactive.

When developing fair value estimates, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. When available, the Company uses quoted market prices to measure fair value. The valuation technique used to measure fair value for the Company's Level 1 and Level 2 assets is a market approach, using prices and other relevant information generated by market transactions involving identical or comparable assets. If market prices are not available, the fair value measurement is based on models that use primarily market-based parameters including yield curves, volatilities, credit ratings and currency rates. In certain cases where market rate assumptions are not available, the Company is required to make judgments about assumptions market participants would use to estimate the fair value of a financial instrument.

The valuation technique used to measure fair value of the Company's Level 3 liability, which consists of a contingent consideration related to the acquisition of Velocius Networks, Inc. ("Velocius") in 2013, is primarily an income approach. The significant unobservable input used in the fair value measurement of the Velocius contingent consideration is the likelihood of achieving development milestones to integrate the acquired technology into the Company's technology. The remaining milestone, with a maximum value of \$1.0 million, is payable in the third quarter of 2015, if achieved.

Changes in the underlying assumptions used to value the Company's Level 3 liability held at March 31, 2015 and December 31, 2014, could increase or decrease the fair value estimates recorded in the consolidated balance sheets. There was no change in the fair value or other activity of the Level 3 Velocius contingent consideration during the three months ended March 31, 2015.

Contractual maturities of the Company's available-for-sale marketable securities held at March 31, 2015 and December 31, 2014 were as follows (in thousands):

	March 31, 2015	December 31, 2014
Due in 1 year or less	\$ 380,728	\$ 519,642
Due after 1 year through 5 years	801,467	869,992
	<u>\$ 1,182,195</u>	<u>\$ 1,389,634</u>

3. Accounts Receivable

Net accounts receivable consisted of the following as of March 31, 2015 and December 31, 2014 (in thousands):

	March 31, 2015	December 31, 2014
Trade accounts receivable	\$ 245,268	\$ 222,531
Unbilled accounts receivable	121,327	116,070
Gross accounts receivable	366,595	338,601
Allowance for doubtful accounts	(863)	(1,033)
Reserve for cash-basis customers	(9,103)	(7,990)
Total accounts receivable reserves	(9,966)	(9,023)
Accounts receivable, net	<u>\$ 356,629</u>	<u>\$ 329,578</u>

4. Goodwill and Acquired Intangible Assets

The change in the carrying amount of goodwill for the three months ended March 31, 2015 was as follows (in thousands):

Balance as of January 1, 2015	\$ 1,051,294
Acquisition of Xerocole, Inc.	12,855
Balance as of March 31, 2015	<u>\$ 1,064,149</u>

The immaterial increase in goodwill during the first quarter of 2015 related to the acquisition of Xerocole, Inc. ("Xerocole") on February 27, 2015, a provider of recursive DNS functionality.

The Company tests goodwill for impairment at least annually. Through the date the consolidated financial statements were issued, no triggering events had occurred that would indicate a potential impairment exists.

Acquired intangible assets that are subject to amortization consist of the following as of March 31, 2015 and December 31, 2014 (in thousands):

	March 31, 2015			December 31, 2014		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Completed technology	\$ 91,581	\$ (48,800)	\$ 42,781	\$ 88,331	\$ (45,537)	\$ 42,794
Customer-related intangible assets	175,150	(94,055)	81,095	173,600	(91,160)	82,440
Non-compete agreements	6,790	(2,563)	4,227	8,890	(4,224)	4,666
Trademarks and trade names	3,700	(1,271)	2,429	3,700	(1,188)	2,512
Acquired license rights	490	(490)	—	490	(490)	—
Total	\$ 277,711	\$ (147,179)	\$ 130,532	\$ 275,011	\$ (142,599)	\$ 132,412

Aggregate expense related to amortization of acquired intangible assets for each of the three months ended March 31, 2015 and 2014 was \$6.8 million. Based on the Company's acquired intangible assets as of March 31, 2015, aggregate expense related to amortization of acquired intangible assets is expected to be \$20.2 million for the remainder of 2015, and \$25.4 million, \$23.8 million, \$17.0 million and \$13.5 million for 2016, 2017, 2018 and 2019, respectively.

5. Convertible Senior Notes

In February 2014, the Company issued \$690.0 million in par value of convertible senior notes due 2019 (the "Notes"). The Notes are senior unsecured obligations of the Company, do not bear regular interest and mature on February 15, 2019, unless repurchased or converted prior to maturity.

At their option, holders may convert their Notes prior to the close of business on the business day immediately preceding August 15, 2018 only under the following circumstances:

- during any calendar quarter commencing after the calendar quarter ended June 30, 2014 (and only during such calendar quarter), if the last reported sale price of the Company's common stock for at least 20 trading days (whether or not consecutive) during the period of 30 consecutive trading days ending on the last trading day of the immediately preceding calendar quarter is greater than or equal to 130% of the conversion price on each applicable trading day;
- during the five business day period after any five consecutive trading day period in which the trading price per \$1,000 principal amount of Notes for each trading day of the measurement period was less than 98% of the product of the last reported sale price of the Company's common stock and the conversion rate on each such trading day; or
- upon the occurrence of specified corporate events.

On or after August 15, 2018, holders may convert all or any portion of their Notes at any time prior to the close of business on the second scheduled trading day immediately preceding the maturity date, regardless of the foregoing circumstances.

Upon conversion, the Company, at its election, may pay or deliver to holders cash, shares of the Company's common stock or a combination of cash and shares of the Company's common stock. The initial conversion rate is 11.1651 shares of the Company's common stock per \$1,000 principal amount, which is equivalent to an initial conversion price of approximately \$89.56 per share, subject to adjustments in certain events, and represents a potential conversion into 7.7 million shares.

In accounting for the issuance of the Notes, the Company separated the Notes into liability and equity components. The carrying cost of the liability component was calculated by measuring the fair value of a similar debt obligation that does not have an associated convertible feature. The carrying amount of the equity component representing the conversion option was determined by deducting the fair value of the liability component from the par value of the Notes. The difference between the principal amount of the Notes and the proceeds allocated to the liability component ("debt discount") is amortized to interest expense using the effective interest method over the term of the Notes. The equity component is recorded in additional

paid-in capital in the consolidated balance sheet and will not be remeasured as long as it continues to meet the conditions for equity classification.

In accounting for the transaction costs related to the issuance of the Notes, the Company allocated the total transaction costs incurred to the liability and equity components based on their relative values. Transaction costs attributable to the liability component are being amortized to interest expense over the term of the Notes, and transaction costs attributable to the equity component are netted with the equity component of the Notes in stockholders' equity.

The Notes consist of the following components (in thousands):

	March 31, 2015	December 31, 2014
Liability component:		
Principal	\$ 690,000	\$ 690,000
Less: debt discount, net of amortization	(80,353)	(85,149)
Net carrying amount	\$ 609,647	\$ 604,851
Equity component:	\$ 101,276	\$ 101,276

The estimated fair value of the Company's Notes at March 31, 2015 was \$746.6 million. The fair value was determined based on data points other than quoted prices that are observable, either directly or indirectly, and has been classified as Level 2 within the fair value hierarchy. Based on the closing price of the Company's common stock of \$71.05 on March 31, 2015, the value of the Notes if converted to common stock was less than the principal amount of \$690.0 million.

The Company used \$62.0 million of the proceeds from the offering to repurchase shares of its common stock, concurrently with the issuance of the Notes. The repurchase was made in accordance with the share repurchase program previously approved by the Board of Directors (Note 7). Additionally, \$23.3 million of the proceeds was used for the net cost of convertible note hedge and warrant transactions. The Company intends to use the remaining net proceeds for working capital and other general corporate purposes, as well as for potential acquisitions and strategic transactions.

Note Hedge

To minimize the impact of potential dilution upon conversion of the Notes, the Company entered into convertible note hedge transactions with respect to its common stock in February 2014. The Company paid \$101.3 million for the note hedge transactions. The note hedge transactions cover approximately 7.7 million shares of the Company's common stock at a strike price that corresponds to the initial conversion price of the Notes, also subject to adjustment, and are exercisable upon conversion of the Notes. The note hedge transactions are intended to reduce dilution in the event of conversion of the Notes.

Warrants

Separately, in February 2014, the Company entered into warrant transactions, whereby the Company sold warrants to acquire, subject to anti-dilution adjustments, up to 7.7 million shares of the Company's common stock at a strike price of approximately \$104.49 per share. The Company received aggregate proceeds of \$78.0 million from the sale of the warrants. The convertible note hedge and warrant transactions will generally have the effect of increasing the conversion price of the Notes to approximately \$104.49 per share.

Interest Expense

The Notes do not bear regular interest, but have an effective interest rate of 3.2% attributable to the conversion feature. The following table sets forth total interest expense included in the statements of income related to the Notes (in thousands):

	For the Three Months Ended March 31,	
	2015	2014
Amortization of debt discount	\$ 455	\$ 188
Amortization of debt issuance costs	4,796	1,990
Capitalization of interest expense	(675)	(237)
Total interest expense	<u>\$ 4,576</u>	<u>\$ 1,941</u>

6. Contingencies

The Company is conducting an internal investigation, with the assistance of outside counsel, relating to sales practices in a country outside the U.S. that represented less than 1% of the Company's revenue during the quarter ended March 31, 2015, and in each of the years ended December 31, 2014, 2013 and 2012. The internal investigation includes a review of compliance with the requirements of the U.S. Foreign Corrupt Practices Act and other applicable laws and regulations by employees in that market. In February 2015, the Company voluntarily contacted the U.S. Securities and Exchange Commission and Department of Justice to advise both agencies of this internal investigation. The Company is cooperating with those agencies. As of the filing of these financial statements, the Company cannot predict the outcome of this matter. No provision with respect to this matter has been made in the Company's consolidated financial statements.

7. Stockholders' Equity*Share Repurchase Program*

In October 2013, the Board of Directors authorized a \$750.0 million share repurchase program, effective from October 16, 2013 through December 31, 2016. During the three months ended March 31, 2015, the Company repurchased 0.9 million shares of its common stock for \$62.7 million.

Stock-Based Compensation

The following table summarizes stock-based compensation included in the Company's consolidated statements of income for the three months ended March 31, 2015 and 2014 (in thousands):

	For the Three Months Ended March 31,	
	2015	2014
Cost of revenue	\$ 3,163	\$ 2,795
Research and development	5,366	4,477
Sales and marketing	12,983	10,532
General and administrative	8,157	7,310
Total stock-based compensation	<u>29,669</u>	<u>25,114</u>
Provision for income taxes	(11,702)	(8,224)
Total stock-based compensation, net of income taxes	<u>\$ 17,967</u>	<u>\$ 16,890</u>

In addition to the amounts of stock-based compensation reported in the table above, the Company's consolidated statements of income for the three months ended March 31, 2015 and 2014, include stock-based compensation reflected as a component of amortization of capitalized internal-use software of \$3.0 million and \$1.9 million, respectively, before income taxes.

8. Accumulated Other Comprehensive Loss

The following table summarizes the changes in accumulated other comprehensive loss, which is reported as a component of stockholders' equity, for the three months ended March 31, 2015 (in thousands):

	Foreign Currency Translation Adjustments	Net Unrealized Gain on Investments	Total
Balance as of January 1, 2015	\$ (22,064)	\$ 4,453	\$ (17,611)
Other comprehensive (loss) income	(8,415)	2,113	(6,302)
Balance as of March 31, 2015	\$ (30,479)	\$ 6,566	\$ (23,913)

The tax effect on accumulated unrealized gain on investments was insignificant as of March 31, 2015 and December 31, 2014. Amounts reclassified from accumulated other comprehensive loss to net income were insignificant for the three months ended March 31, 2015.

9. Income Taxes

The Company's effective income tax rate was 35.0% and 39.2% for the three months ended March 31, 2015 and 2014, respectively. The effective income tax rate is based on estimated income for the year, the estimated composition of the income in different jurisdictions and discrete adjustments, if any, in the applicable quarterly periods, including retroactive changes in tax legislation, settlements of tax audits or assessments, the resolution or identification of tax position uncertainties and acquisitions of other companies.

For the three months ended March 31, 2015, the effective income tax rate reflects the federal statutory tax rate. The effects of accounting for stock-based compensation in accordance with the authoritative guidance for share-based payments and state income taxes cause our tax rate to be higher than the federal statutory tax rate; however, those items were offset by the domestic production activities deduction and the composition of income from foreign jurisdictions that is taxed at lower rates compared to the statutory tax rates in the U.S. For the three months ended March 31, 2014, the effective income tax rate was higher than the federal statutory tax rate mainly due to the effects of accounting for stock-based compensation in accordance with the authoritative guidance for share-based payments and state income taxes.

10. Net Income per Share

Basic net income per share is computed using the weighted average number of common shares outstanding during the applicable period. Diluted net income per share is computed using the weighted average number of common shares outstanding during the period, plus the dilutive effect of potential common stock. Potential common stock consists of shares issuable pursuant to stock options, restricted stock units ("RSUs"), deferred stock units, convertible senior notes and warrants issued by the Company. The dilutive effect of outstanding awards and convertible securities is reflected in diluted earnings per share by application of the treasury stock method.

The following table sets forth the components used in the computation of basic and diluted net income per share for the three months ended March 31, 2015 and 2014 (in thousands, except per share data):

	For the Three Months Ended March 31,	
	2015	2014
Numerator:		
Net income	\$ 77,746	\$ 72,800
Denominator:		
Shares used for basic net income per share	178,545	178,705
Effect of dilutive securities:		
Stock options	996	1,382
RSUs and deferred stock units	1,284	1,951
Convertible senior notes	—	—
Warrants related to issuance of convertible senior notes	—	—
Shares used for diluted net income per share	180,825	182,038
Basic net income per share	\$ 0.44	\$ 0.41
Diluted net income per share	\$ 0.43	\$ 0.40

For the three months ended March 31, 2015 and 2014, certain potential outstanding shares from stock options, service-based RSUs, convertible notes and warrants were excluded from the computation of diluted net income per share because the effect of including these items would be anti-dilutive. Additionally, certain performance-based RSUs were excluded from the computation of diluted net income per share because the underlying performance conditions for such RSUs had not been met as of these dates. The number of potentially outstanding shares excluded from the computation of diluted net income per share for the three months ended March 31, 2015 and 2014 are as follows (in thousands):

	For the Three Months Ended March 31,	
	2015	2014
Stock options	26	651

Service-based RSUs	622	514
Performance-based RSUs	1,148	575
Convertible senior notes	7,704	7,704
Warrants related to issuance of convertible senior notes	7,704	7,704

The calculation of assumed proceeds used to determine the diluted weighted average shares outstanding under the treasury stock method in the periods presented was adjusted by tax windfalls and shortfalls associated with all of the

Company's outstanding stock awards. Such windfalls and shortfalls are computed by comparing the tax deductible amount of outstanding stock awards to their grant date fair values and multiplying the results by the applicable statutory tax rate. A positive result creates a windfall, which increases the assumed proceeds, and a negative result creates a shortfall, which reduces the assumed proceeds.

11. Subsequent Events

On April 6, 2015, the Company acquired all of the outstanding capital stock of Codemate A/S and its wholly owned subsidiary Octoshape ApS ("Octoshape") in exchange for \$107.5 million in cash, subject to post-closing adjustments. The allocation of the purchase price has not been finalized as of the date of the filing of these financial statements. The goal of acquiring Octoshape is to provide customers with the most comprehensive suite of delivery and optimization technologies for video streams of over-the-top (OTT) content and to enable Internet Protocol television (IPTV) solutions. Pro forma results of operations for the acquisition of Octoshape have not been presented because the effects are not material to the Company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This quarterly report on Form 10-Q, particularly Management's Discussion and Analysis of Financial Condition and Results of Operations set forth below, and notes to our unaudited consolidated financial statements included herein contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are subject to risks and uncertainties and are based on the beliefs and assumptions of our management as of the date hereof based on information currently available to our management. Use of words such as "believes," "expects," "anticipates," "intends," "plans," "estimates," "should," "forecasts," "if," "continues," "goal," "likely" or similar expressions indicates a forward-looking statement. Forward-looking statements are not guarantees of future performance and involve risks, uncertainties and assumptions. Actual results may differ materially from the forward-looking statements we make. See "Risk Factors" elsewhere in this quarterly report on Form 10-Q for a discussion of certain risks associated with our business. We disclaim any obligation to update forward-looking statements as a result of new information, future events or otherwise.

Our management's discussion and analysis of our financial condition and results of operations is based upon our unaudited consolidated financial statements included elsewhere in this quarterly report on Form 10-Q, which we have prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP, for interim periods and with Regulation S-X promulgated under the Securities Exchange Act of 1934, as amended, or the Exchange Act. The preparation of these unaudited consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related items, including, but not limited to, revenue recognition, accounts receivable and related reserves, valuation and impairment of marketable securities, goodwill and acquired intangible assets, capitalized internal-use software costs, impairment and useful lives of long-lived assets, income tax, and stock-based compensation. We base our estimates and judgments on historical experience and on various other assumptions that we believe to be reasonable under the circumstances at the time they are made. Actual results may differ from our estimates. See the section entitled "Application of Critical Accounting Policies and Estimates" in our annual report on Form 10-K for the year ended December 31, 2014 for further discussion of our critical accounting policies and estimates.

Overview

We provide cloud services for delivering, optimizing and securing online content and business applications. We generally execute contracts with terms of one year or longer, and we believe this emphasis on longer-term contracts allows us to have a consistent and predictable base level of revenue which is important to our financial success. We have been able to increase our revenue and profitability in recent years because we have expanded our customer base and increased the amount and value of services, features and functionalities that our customers purchase. These achievements have enabled us to limit the impact of customer cancellations and terminations and price reductions resulting from contract renewals. Continuing these trends requires that we compete effectively in the marketplace on the basis of the quality, price and overall attractiveness of our services and technology.

Our revenue is primarily impacted by the timing and variability of customer-specific one-time events, the prices we are able to charge for our services, the amount of traffic we serve on our network and the impact of seasonal variations on our business. We have observed the following trends related to our revenue in recent years:

- On a consistent basis, we have increased committed recurring revenue by adding new customers and increasing sales of incremental services to our existing customers. We have also experienced increases in the rate of traffic delivered to our customers that use our solutions for video, gaming, social media and software downloads. These increases have offset price reductions and losses of customers to competitors or in-house solutions.
- The unit prices paid by some of our customers have declined, reflecting the impact of competition. These price reductions have primarily impacted customers for which we deliver high volumes of traffic over our network.
- We have experienced variations in certain types of revenue from quarter to quarter; in particular, we experience higher revenue in the fourth quarter of the year for some of our solutions as a result of the holiday season. We also experience lower revenue in the summer months, particularly in Europe, from both e-commerce and media customers because overall Internet use declines during that time. In addition, we experience quarterly variations in revenue attributable to the nature and timing of software and gaming releases by our customers using our software download solutions.

Our profitability is also impacted by our expense levels, including direct costs to support our revenue, such as co-location and bandwidth costs, and expenses incurred to support strategic initiatives that we anticipate will generate revenue in the future. We have observed the following trends related to our profitability in recent years:

- We have increased headcount to support our revenue growth and strategic initiatives, and as a result, our payroll and related compensation costs have increased. We increased our headcount by 1,200 employees in 2014, including 200 employees who were part of the acquisition of Prolexic Technologies, Inc., or Prolexic, in the first quarter of 2014. We hired an additional 300 employees during the three months ended March 31, 2015. We expect to continue to hire additional employees and expand globally in support of our strategic initiatives.
- Network bandwidth costs represent a significant portion of our cost of revenue. Historically, we have been able to mitigate increases in these costs by reducing our network bandwidth costs per unit and investing in internal-use software development to improve the performance and efficiency of our network. Our total bandwidth costs may increase in the future as a result of expected higher traffic levels, but we believe such costs would be partially offset by anticipated continued reductions in bandwidth costs per unit and efficiency measures we take.
- Co-location costs are also a significant portion of our cost of revenue. By improving our internal-use software and managing our hardware deployments to enable us to use servers more efficiently, we have been able to manage the growth of co-location costs. We expect to continue to scale our network in the future and will need to effectively manage our co-location costs to maintain current levels of profitability.

Fluctuations of foreign currency exchange rates have also impacted our reported results. Revenue and expenses of our international operations are important contributors to our overall financial performance, and as currencies have weakened against the U.S. dollar, our revenue has been negatively impacted and our expenses have been positively impacted. If foreign currency exchange rates during the first quarter of 2015 had remained the same as exchange rates during the first quarter of 2014, our revenue would have increased by 20% as opposed to 16%. Similarly, diluted earnings per share would have increased by 16% as opposed to 8% had exchange rates remained constant.

In February 2014, we completed the acquisition of Prolexic. Revenues and expenses from the acquired operations have been included in our earnings since the acquisition date of February 18, 2014.

Results of Operations

The following table sets forth, as a percentage of revenue, consolidated statements of income data for the periods indicated:

	For the Three Months Ended March 31,	
	2015	2014
Revenue	100.0 %	100.0 %
Cost of revenue (exclusive of amortization of acquired intangible assets shown below)	32.2	30.8
Research and development expense	6.8	6.2
Sales and marketing expense	19.7	17.9
General and administrative expense	17.0	16.8
Amortization of acquired intangible assets	1.3	1.5
Restructuring charges	—	0.2
Total costs and operating expenses	77.0	73.4
Income from operations	23.0	26.6
Interest income	0.6	0.4
Interest expense	(0.9)	(0.4)
Other expense, net	(0.1)	(0.2)
Income before provision for income taxes	22.6	26.4
Provision for income taxes	8.0	10.3
Net income	14.6 %	16.1 %

Revenue

Revenue during the periods presented was as follows (in thousands):

	For the Three Months Ended March 31,			% Change at Constant Currency
	2015	2014	% Change	
Revenue	\$ 526,536	\$ 453,502	16.1%	19.9%

During the three-month period ended March 31, 2015, the increase in our revenue as compared to the same period in 2014 was driven by increased demand for our services across all of our solutions and geographies. For the three-month periods ended March 31, 2015 and 2014, no single customer accounted for 10% or more of revenue.

Changes in foreign currency exchange rates negatively impacted our revenue by \$17.2 million during the three-month period ended March 31, 2015, as compared to the same period in 2014.

For the three-month period ended March 31, 2015, resellers accounted for 26% of revenue as compared to 24% of revenue for the same period in 2014. The increase in revenue from resellers was attributable to increased traction with our carrier channel partners.

During the first quarter of 2015, we elected to revise the presentation of our revenue solution categories, primarily related to how we present product-specific services revenue. Historically, product-specific services revenue was classified as Service and Support Solutions revenue. Beginning in the first quarter of 2015, product-specific services are classified in their respective product solution categories, and accordingly, we have revised prior period amounts in the table below.

The following table quantifies the contribution to revenue during the periods presented from our solution categories (in thousands):

	For the Three Months Ended March 31,			% Change at Constant Currency
	2015	2014	% Change	
Media Delivery Solutions	\$ 241,842	\$ 215,889	12.0%	16.2%
Performance and Security Solutions	244,982	202,179	21.2	24.6
Service and Support Solutions	39,712	35,434	12.1	15.8
Total revenue	\$ 526,536	\$ 453,502	16.1%	19.9%

The increase in Media Delivery Solutions revenue for the three-month period ended March 31, 2015, as compared to the same period in 2014, was due to higher demand across most of our customer base and particularly from our largest, most strategic accounts. The increase was offset by several large software and gaming releases, as well as the Sochi Olympics, during the three-month period ended March 31, 2014.

The increase in Performance and Security Solutions revenue for the three-month period ended March 31, 2015, as compared to the same period in 2014, was due to increased demand across all major product lines, with especially strong growth for our Cloud Security Solutions, which increased from \$30.2 million in the first quarter of 2014 to \$55.0 million during the first quarter of 2015. The increase was also impacted by the acquisition of Prolexic, which occurred in February 2014.

The increase in Service and Support Solutions revenue for the three-month period ended March 31, 2015, as compared to the same period in 2014, was due to higher sales of our service and support offerings from new customer attachment rates for enterprise-class professional services and enhanced customer support.

The following table quantifies revenue derived in the U.S. and internationally (in thousands):

	For the Three Months Ended March 31,			% Change at Constant Currency
	2015	2014	% Change	
U.S.	\$ 388,973	\$ 325,184	19.6%	19.6%
International	137,563	128,318	7.2	20.6
Total revenue	\$ 526,536	\$ 453,502	16.1%	19.9%

For the three-month periods ended March 31, 2015 and 2014, approximately 26% and 28%, respectively, of our revenue was derived from our operations located outside of the U.S. No single country outside of the U.S. accounted for 10% or more of revenue during either of these periods.

Revenue from our operations in the U.S. experienced strong performance across all of our solution categories during the three months ended March 31, 2015. During the first quarter of 2015, we also experienced strong revenue growth from our operations in the Asia Pacific region and continued improvement in revenue growth from our operations in Europe, the Middle East and Africa, attributable to sales growth across all of our solutions.

Cost of Revenue

Cost of revenue consisted of the following for the periods presented (in thousands):

	For the Three Months Ended March 31,		
	2015	2014	% Change
Bandwidth fees	\$ 35,513	\$ 28,837	23.2%
Co-location fees	29,691	28,020	6.0
Network build-out and supporting services	11,427	10,047	13.7
Payroll and related costs	37,552	31,418	19.5
Stock-based compensation, including amortization of prior capitalized amounts	5,978	4,625	29.3
Depreciation of network equipment	31,499	24,791	27.1
Amortization of internal-use software	17,634	11,874	48.5
Total cost of revenue	\$ 169,294	\$ 139,612	21.3%
<i>As a percentage of revenue</i>	<i>32.2%</i>	<i>30.8%</i>	

The increase in total cost of revenue for the three-month period ended March 31, 2015 as compared to the same period in 2014 was primarily due to increases in:

- payroll and related costs of service personnel due to headcount growth to support our product-aligned and discrete services revenue growth, as well as headcount growth related to our network operations to support our other solution categories;
- amounts paid to network providers for bandwidth fees to support the increase in traffic served on our network; and
- depreciation of network equipment and amortization of internal-use software as we continued to invest in our infrastructure and release internally developed software onto our network.

We have long-term purchase commitments for co-location services and bandwidth usage with various vendors and network and Internet service providers. Our minimum commitments related to bandwidth usage and co-location services may vary from period to period depending on the timing and length of contract renewals with our service providers. There have been no significant changes to the commitments reported in our annual report on Form 10-K for the year ended December 31, 2014, other than normal period-to-period variations.

We believe that cost of revenue will increase during the remaining quarters of 2015 as compared to the first quarter of 2015, primarily because we expect to deploy more servers and deliver more traffic on our network, which will result in higher expenses associated with the increased traffic and additional co-location fees; however, such costs are likely to be partially offset by lower bandwidth costs per unit and continued efficiency in network deployment. Additionally, for the remaining quarters of 2015, we anticipate amortization of internal-use software development costs to increase, as compared to the first quarter of 2015, along with increased payroll and related costs associated with our network and professional services personnel and related expenses. We plan to continue making investments in our network with the expectation that our customer base will continue to expand and that we will continue to deliver more traffic to existing customers.

Research and Development Expenses

Research and development expenses consisted of the following for the periods presented (in thousands):

	For the Three Months Ended March 31,		
	2015	2014	% Change
Payroll and related costs	\$ 54,935	\$ 42,431	29.5%
Stock-based compensation	5,366	4,477	19.9
Capitalized salaries and related costs	(26,242)	(20,000)	31.2
Other expenses	1,769	1,326	33.4
Total research and development	\$ 35,828	\$ 28,234	26.9%
<i>As a percentage of revenue</i>	<i>6.8%</i>	<i>6.2%</i>	

The increase in research and development expenses during the three-month period ended March 31, 2015, as compared to the same period in 2014, was due to increases in payroll and related costs as a result of continued growth in headcount to support investments in new product development and network scaling, partially offset by increases in capitalized salaries and related costs.

Research and development costs are expensed as incurred, other than certain internal-use software development costs eligible for capitalization. These development costs consist of payroll and related costs for personnel and external consulting expenses involved in the development of internal-use software used to deliver our services and operate our network. During the three-month periods ended March 31, 2015 and 2014, we capitalized \$3.7 million and \$3.8 million, respectively, of stock-based compensation. These capitalized internal-use software costs are amortized to cost of revenue over their estimated useful lives, which is generally two years.

We believe that research and development expenses will increase in absolute dollars during the remaining quarters of 2015 as compared to the first quarter of 2015, as we expect to continue to hire additional development personnel in order to make improvements to our core technology and support the development of new services and engineering innovation.

Sales and Marketing Expenses

Sales and marketing expenses consisted of the following for the periods presented (in thousands):

	For the Three Months Ended March 31,		
	2015	2014	% Change
Payroll and related costs	\$ 72,068	\$ 54,684	31.8%
Stock-based compensation	12,983	10,532	23.3
Marketing programs and related costs	11,776	10,520	11.9
Other expenses	6,652	5,329	24.8
Total sales and marketing	\$ 103,479	\$ 81,065	27.6%
<i>As a percentage of revenue</i>	<i>19.7%</i>	<i>17.9%</i>	

The increase in sales and marketing expenses during the three-month period ended March 31, 2015, as compared to the same period in 2014, was primarily due to higher payroll and related costs, as we invested in our sales and marketing organization, and to an increase in marketing programs and related costs in support of our go-to-market strategy and ongoing geographic expansion. Other expenses, which consists primarily of sales and marketing events and related travel expenses, increased as we grew our sales and marketing organization.

We believe that sales and marketing expenses will increase in absolute dollars during the remaining quarters of 2015 as compared to the first quarter of 2015, due to an expected increase in payroll and related costs as a result of anticipated continued headcount growth, primarily with respect to our direct sales team and corporate marketing function.

General and Administrative Expenses

General and administrative expenses consisted of the following for the periods presented (in thousands):

	For the Three Months Ended March 31,		
	2015	2014	% Change
Payroll and related costs	\$ 41,137	\$ 32,310	27.3 %
Stock-based compensation	8,157	7,310	11.6
Depreciation and amortization	11,733	8,173	43.6
Facilities-related costs	14,232	12,994	9.5
Provision for doubtful accounts	(9)	(103)	(91.3)
Acquisition-related costs	718	3,392	(78.8)
Professional fees and other expenses	13,624	12,085	12.7
Total general and administrative	\$ 89,592	\$ 76,161	17.6 %
<i>As a percentage of revenue</i>	<i>17.0%</i>	<i>16.8%</i>	

The increase in general and administrative expenses for the three-month period ended March 31, 2015, as compared to the same period in 2014, was primarily due to the expansion of company infrastructure to support investments in engineering, go-to-market capacity and enterprise expansion initiatives. In particular, we increased general and administrative headcount and our facility footprint, which increased payroll and related costs, facilities-related costs and depreciation and amortization. This was partially offset by a decrease in acquisition-related costs due to the acquisition of Prolexic in the first quarter of 2014, with no corresponding acquisition of comparable size for the three-month period ended March 31, 2015.

During the remaining quarters of 2015, we expect general and administrative expenses to increase in absolute dollars as compared to the first quarter of 2015, due to anticipated higher payroll and related costs and facilities-related costs attributable to increased hiring, investment in information technology and planned facility expansion.

Amortization of Acquired Intangible Assets

<i>(in thousands)</i>	For the Three Months Ended March 31,		
	2015	2014	% Change
Amortization of acquired intangible assets	\$ 6,780	\$ 6,848	(1.0)%
<i>As a percentage of revenue</i>	1.3%	1.5%	

Amortization of acquired intangible assets for the three-month period ended March 31, 2015 as compared to the same period in 2014 was relatively consistent. However, the first quarter of 2015 includes a full quarter of amortization of the acquired intangible assets of Prolexic, as opposed to a partial quarter in the same period in 2014, which is offset by the expected declining rate of amortization of certain intangible assets. Based on our intangible assets at March 31, 2015, we expect amortization of acquired intangible assets to be approximately \$20.2 million for the remainder of 2015, and \$25.4 million, \$23.8 million, \$17.0 million and \$13.5 million for 2016, 2017, 2018 and 2019, respectively.

Restructuring Charges

<i>(in thousands)</i>	For the Three Months Ended March 31,		
	2015	2014	% Change
Restructuring charges	\$ 42	\$ 735	(94.3)%
<i>As a percentage of revenue</i>	—%	0.2%	

The restructuring charges for the three-month period ended March 31, 2015 consisted of severance expenses as a result of the acquisition of Xerocolle, Inc. The charges for the three-month period ended March 31, 2014 consisted of severance expenses as a result of the acquisition of Prolexic.

Non-Operating Income (Expense)

<i>(in thousands)</i>	For the Three Months Ended March 31,		
	2015	2014	% Change
Interest income	\$ 3,001	\$ 1,639	83.1 %
<i>As a percentage of revenue</i>	0.6 %	0.4 %	
Interest expense	(4,576)	(1,941)	135.8 %
<i>As a percentage of revenue</i>	(0.9)%	(0.4)%	
Other expense, net	(301)	(881)	(65.8)%
<i>As a percentage of revenue</i>	(0.1)%	(0.2)%	

For the periods presented, interest income consists of interest earned on invested cash balances and marketable securities, and interest expense consists of the amortization of the debt discount and debt issuance costs related to our convertible senior notes issued in February 2014.

Other expense, net primarily represents net foreign exchange gains and losses incurred and other non-operating expense and income items. The fluctuations in other expense, net for the three-month period ended March 31, 2015, as compared to the same period in 2014, were primarily due to foreign currency exchange rate fluctuations on inter-company and other non-functional currency transactions. Other expense, net may fluctuate in the future based upon changes in foreign exchange rates or other events.

Provision for Income Taxes

<i>(in thousands)</i>	For the Three Months Ended March 31,		
	2015	2014	% Change
Provision for income taxes	\$ 41,899	\$ 46,864	(10.6)%
<i>As a percentage of revenue</i>	8.0%	10.3%	
<i>Effective income tax rate</i>	35.0%	39.2%	

For the three-month period ended March 31, 2015, our effective income tax rate reflects the federal statutory tax rate. The effects of accounting for stock-based compensation in accordance with the authoritative guidance for share-based payments and state income taxes cause our tax rate to be higher than the federal statutory tax rate; however, those items were offset by the domestic production activities deduction and the composition of income from foreign jurisdictions that is taxed at lower rates compared to the statutory tax rates in the U.S. during the first quarter of 2015. For the three-month period ended March 31, 2014, our effective income tax rate was higher than the federal statutory tax rate mainly due to the effects of accounting for stock-based compensation in accordance with the authoritative guidance for share-based payments and state income taxes.

We expect our effective income tax rate to decrease slightly during the remaining quarters of 2015, due to known discrete items occurring in future quarters. This expectation does not take into consideration the effect of potential other one-time discrete items that may be recorded in the future. The effective tax rate could be different depending on the nature and timing of dispositions of incentive stock options and other employee equity awards. Further, our effective tax rate may fluctuate within a fiscal year and from quarter to quarter due to items arising from discrete events, including settlements of tax audits and assessments, the resolution or identification of tax position uncertainties and acquisitions of other companies.

In determining our net deferred tax assets and valuation allowances, annualized effective tax rates and cash paid for income taxes, management is required to make judgments and estimates about domestic and foreign profitability, the timing and extent of the utilization of net operating loss carryforwards, applicable tax rates, transfer pricing methodologies and tax planning strategies. Judgments and estimates related to our projections and assumptions are inherently uncertain; therefore, actual results could differ materially from our projections.

We have recorded certain tax reserves to address potential exposures involving our income tax and sales and use tax positions. These potential tax liabilities result from the varying application of statutes, rules, regulations and interpretations by different taxing jurisdictions. Our estimate of the value of these tax reserves reflects assumptions based on past experiences and judgments about the interpretation of statutes, rules and regulations by taxing jurisdictions. It is possible that the ultimate tax liability or benefit from these matters may be materially greater or less than the amount that we have estimated.

Non-GAAP Financial Measures

In addition to providing financial measurements based on GAAP, we publicly discuss additional financial measures that are not prepared in accordance with GAAP, or non-GAAP financial measures. Management uses non-GAAP financial measures, in addition to GAAP financial measures, to understand and compare operating results across accounting periods, for financial and operational decision making, for planning and forecasting purposes and to evaluate our financial performance. These non-GAAP financial measures are: non-GAAP income from operations, non-GAAP operating margin, non-GAAP net income, non-GAAP net income per diluted share, Adjusted EBITDA, Adjusted EBITDA margin and impact of foreign currency exchange rates, as discussed below.

Management believes that these non-GAAP financial measures reflect our ongoing business in a manner that allows for meaningful comparisons and analysis of trends in the business, as they exclude expenses and gains that may be infrequent, unusual in nature or not reflective of our ongoing operating results. Management also believes that these non-GAAP financial measures enable investors to evaluate our operating results and future prospects in the same manner as management. These non-GAAP financial measures may also facilitate comparing financial results across accounting periods and to those of peer companies.

The non-GAAP financial measures do not replace the presentation of our GAAP financial measures and should only be used as a supplement to, not as a substitute for, our financial results presented in accordance with GAAP.

The non-GAAP adjustments, and our basis for excluding them from non-GAAP financial measures, are outlined below:

- **Amortization of acquired intangible assets** – We have incurred amortization of intangible assets, included in our GAAP financial statements, related to various acquisitions we made. The amount of an acquisition's purchase price allocated to intangible assets and term of its related amortization can vary significantly and are unique to each acquisition; therefore, we exclude amortization of acquired intangible assets from our non-GAAP financial measures to provide investors with a consistent basis for comparing pre- and post-acquisition operating results.
- **Stock-based compensation and amortization of capitalized stock-based compensation** – Although stock-based compensation is an important aspect of the compensation paid to our employees and executives, the expense varies with changes in the stock price and market conditions at the time of grant, varying valuation methodologies, subjective assumptions and the variety of award types. This makes the comparison of our current financial results to previous and future periods difficult to interpret; therefore, we believe it is useful to exclude stock-based compensation and amortization of capitalized stock-based compensation from our non-GAAP financial measures in order to highlight the performance of our core business and to be consistent with the way investors evaluate our performance and compare our operating results to peer companies.
- **Acquisition-related costs** – Acquisition-related costs include transaction fees, due diligence costs and other direct costs associated with strategic activities. In addition, subsequent adjustments to our initial estimated amounts of contingent consideration and indemnifications associated with specific acquisitions are included within acquisition-related costs. These amounts are impacted by the timing and size of the acquisitions. We exclude acquisition-related costs from our non-GAAP financial measures to provide a useful comparison of our operating results to prior periods and to our peer companies because such amounts vary significantly based on the magnitude of our acquisition transactions.
- **Restructuring charges** – We have incurred restructuring charges that are included in our GAAP financial statements, primarily related to workforce reductions and estimated costs of exiting facility lease commitments. We exclude these items from our non-GAAP financial measures when evaluating our continuing business performance as such items are not consistently recurring and do not reflect expected future operating expense, nor provide meaningful insight into the fundamentals of current or past operations of our business.
- **Amortization of debt discount and issuance costs and amortization of capitalized interest expense** – In February 2014, we issued \$690 million of convertible senior notes due 2019 with a coupon interest rate of 0%. The imputed interest rate of the convertible senior notes was approximately 3.2%. This is a result of the debt discount recorded for the conversion feature that is required to be separately accounted for as equity, thereby reducing the carrying value of the convertible debt instrument. The debt discount is amortized as interest expense together with the issuance costs of the debt which are recorded as an asset in the consolidated balance sheet. All of our interest expense is comprised of these non-cash components and is excluded from management's assessment of our operating performance because management believes the non-cash expense is not indicative of ongoing operating performance.
- **Loss on investments and legal matters** – We have incurred losses from the impairment of certain investments and the settlement of legal matters. In addition, we have incurred costs with respect to our internal investigation related to sales practices in a country outside of the U.S. We believe excluding these amounts from our non-GAAP financial measures is useful to investors as they occur infrequently and are not representative of our core business operations.
- **Income tax effect of non-GAAP adjustments and certain discrete tax items** – The non-GAAP adjustments described above are reported on a pre-tax basis. The income tax effect of non-GAAP adjustments is the difference between GAAP and non-GAAP income tax expense. Non-GAAP income tax expense is computed on non-GAAP pre-tax income (GAAP pre-tax income adjusted for non-GAAP adjustments) and excludes certain discrete tax items (such as recording or release of valuation allowances), if any. We believe that applying the non-GAAP adjustments and their related income tax effect allows us to highlight income attributable to our core operations.

The following table reconciles GAAP income from operations to non-GAAP income from operations and non-GAAP operating margin for the periods presented (in thousands):

	For the Three Months Ended March 31,	
	2015	2014
Income from operations	\$ 121,521	\$ 120,847
Amortization of acquired intangible assets	6,780	6,848
Stock-based compensation	29,669	25,114
Amortization of capitalized stock-based compensation and capitalized interest expense	3,108	1,928
Other operating expenses	1,709	4,127
Non-GAAP income from operations	\$ 162,787	\$ 158,864
GAAP operating margin	23%	27%
Non-GAAP operating margin	31%	35%

Other operating expenses excluded from the non-GAAP results presented in the table above includes: acquisition-related costs, restructuring charges and certain legal matter costs.

The following table reconciles GAAP net income to non-GAAP net income and non-GAAP net income per diluted share for the periods presented (in thousands, except per share data):

	For the Three Months Ended March 31,	
	2015	2014
Net income	\$ 77,746	\$ 72,800
Amortization of acquired intangible assets	6,780	6,848
Stock-based compensation	29,669	25,114
Amortization of capitalized stock-based compensation and capitalized interest expense	3,108	1,928
Other operating expenses	1,709	4,127
Amortization of debt discount and issuance costs	4,576	1,941
Loss on investments	25	—
Income tax effect of above non-GAAP adjustments and certain discrete tax items	(12,437)	(7,841)
Non-GAAP net income	\$ 111,176	\$ 104,917
GAAP net income per diluted share	\$ 0.43	\$ 0.40
Non-GAAP net income per diluted share	\$ 0.61	\$ 0.58
Shares used in diluted per share calculations	180,825	182,038

Other operating expenses excluded from the non-GAAP results presented in the table above includes: acquisition-related costs, restructuring charges and certain legal matter costs.

Non-GAAP net income per diluted share is calculated as non-GAAP net income divided by diluted weighted average common shares outstanding. GAAP diluted weighted average shares outstanding are adjusted in non-GAAP per share calculations for the shares that would be delivered to us pursuant to the note hedge transactions entered into in connection with the issuance of \$690.0 million in par value of convertible senior notes due 2019. Under GAAP, shares delivered under hedge transactions are not considered offsetting shares in the fully diluted share calculation until they are delivered. However, we would receive a benefit from the note hedge transactions and would not allow the dilution to occur, so management believes that adjusting for this benefit provides a meaningful view of net income per share. Until our weighted average stock price is greater than \$89.56, the initial conversion price, there will be no difference between our GAAP and non-GAAP diluted weighted average common shares outstanding.

We consider Adjusted EBITDA to be another important indicator of the operational strength and performance of our business and a good measure of our historical operating trends. Adjusted EBITDA eliminates items that are either not part of our core operations or do not require a cash outlay. We define Adjusted EBITDA as GAAP net income excluding the following items: interest income; income taxes; depreciation and amortization of tangible and intangible assets; stock-based compensation; amortization of capitalized stock-based compensation; other operating expenses (comprised of acquisition-related costs, restructuring charges, benefit from adoption of software development activities, gains and other activity related to divestiture of a business, gains and losses on legal settlements, and costs incurred with respect to Akamai's internal investigation relating to sales practices in a country outside the U.S.); foreign exchange gains and losses; loss on early extinguishment of debt; amortization of debt discount and issuance costs; amortization of capitalized interest expense; certain gains and losses on investments; and other non-recurring or unusual items that may arise from time to time. Adjusted EBITDA margin represents Adjusted EBITDA stated as a percentage of revenue.

The following table reconciles GAAP net income to Adjusted EBITDA and Adjusted EBITDA margin for the periods presented (in thousands):

	For the Three Months Ended March 31,	
	2015	2014
Net income	\$ 77,746	\$ 72,800
Amortization of acquired intangible assets	6,780	6,848
Stock-based compensation	29,669	25,114
Amortization of capitalized stock-based compensation and capitalized interest expense	3,108	1,928
Other operating expenses	1,709	4,127
Interest income	(3,001)	(1,639)
Amortization of debt discount and issuance costs	4,576	1,941
Provision for income taxes	41,899	46,864
Depreciation and amortization	60,572	44,740
Other expense, net	301	881
Adjusted EBITDA	\$ 223,359	\$ 203,604
Adjusted EBITDA margin	42%	45%

Impact of Foreign Currency Exchange Rates

Revenue and earnings from our international operations have historically been an important contributor to our financial results. Consequently, our financial results have been impacted, and management expects they will continue to be impacted, by fluctuations in foreign currency exchange rates. For example, when the local currencies of our foreign subsidiaries weaken, our consolidated results stated in U.S. dollars are negatively impacted.

Because exchange rates are a meaningful factor in understanding period-to-period comparisons, management believes the presentation of the impact of foreign currency exchange rates on revenue and earnings enhances the understanding of our financial results and evaluation of performance in comparison to prior periods. The dollar impact of changes in foreign currency exchange rates presented is calculated by translating current period results using average foreign currency exchange rates per month from the comparative period and comparing it to the as reported amount. The percentage change at constant currency presented is calculated by comparing the prior period amounts as reported and the current period amount translated using the same average foreign currency exchange rates per month from the comparative period.

Liquidity and Capital Resources

To date, we have financed our operations primarily through public and private sales of debt and equity securities and cash generated by operations. As of March 31, 2015, our cash, cash equivalents and marketable securities, which consisted primarily of corporate bonds and U.S. government agency securities, totaled \$1.5 billion. Factoring in our convertible senior notes, our net cash is \$825.1 million. We place our cash investments in instruments that meet high quality credit standards, as specified in our investment policy. Our investment policy also limits the amount of our credit exposure to any one issue or

issuer and seeks to manage these assets to achieve our goals of preserving principal and maintaining adequate liquidity at all times.

Changes in cash, cash equivalents and marketable securities are dependent upon changes in, among other things, working capital items such as deferred revenues, accounts payable, accounts receivable and various accrued expenses, as well as changes in our capital and financial structure due to common stock repurchases, debt repurchases and issuances, stock option exercises, purchases and sales of marketable securities and similar events. We believe our strong balance sheet and cash position are important competitive differentiators that provide the financial flexibility necessary to make investments at opportune times. We expect to continue to evaluate strategic investments to strengthen our business on an ongoing basis.

As of March 31, 2015, we had cash and cash equivalents of \$137.9 million held in accounts outside the U.S. An immaterial amount of these funds would be subject to U.S. federal taxation if repatriated, with such tax liability partially offset by foreign tax credits. The remainder of our cash and cash equivalents held outside the U.S. are subject to, or offset by, inter-company obligations to our parent company in the U.S. and, therefore, are not subject to U.S. federal taxation. As a result, our liquidity is not materially impacted by the amount of cash and cash equivalents held in accounts outside the U.S.

Cash Provided by Operating Activities

	For the Three Months Ended March 31,	
	2015	2014
<i>(in thousands)</i>		
Net income	\$ 77,746	\$ 72,800
Non-cash reconciling items included in net income	100,325	67,355
Changes in operating assets and liabilities	(78,342)	(51,132)
Net cash flows provided by operating activities	\$ 99,729	\$ 89,023

The increase in cash provided by operating activities for the three-month period ended March 31, 2015 as compared to the same period in 2014 was primarily due to a \$30.3 million decrease in cash paid for taxes year-over-year and increased profitability, partially offset by an increase in bonus and commission payments due to our headcount growth and higher performance attainment. Accounts receivable days sales outstanding was 59 days as of March 31, 2015, compared to 58 days as of March 31, 2014.

Cash Provided by (Used in) Investing Activities

	For the Three Months Ended March 31,	
	2015	2014
<i>(in thousands)</i>		
Cash paid for acquired businesses, net of cash acquired	\$ (16,062)	\$ (386,647)
Purchases of property and equipment and capitalization of internal-use software development costs	(137,069)	(84,006)
Net marketable securities activity	210,351	(258,973)
Other investing activity	(82)	(832)
Net cash provided by (used in) investing activities	\$ 57,138	\$ (730,458)

The increase in cash provided by (used in) investing activities primarily relates to the acquisition of Prolexic during the three-month period ended March 31, 2014, with no corresponding acquisition of the same magnitude in the three-month period ended March 31, 2015. The increase in cash provided by (used in) investing activities was partially offset by an increase of purchases of property and equipment and capitalized internal-use software during the three-month period ended March 31, 2015, as compared to the same period in 2014, as we continued to invest in our network with the goal of enhancing and adding functionality to our service offerings.

During the three-month period ended March 31, 2015, we completed large planned investments in our network infrastructure to support the continued growth of our customers and the expected increase in traffic growth. Additionally, during the three-month period ended March 31, 2015, we incurred facility build-outs and IT costs to support our increase in headcount and the expansion of company infrastructure to support our engineering and go-to-market strategy. While we will continue to

make investments in these areas, we do not expect expenditures to continue at the same rate for each of the remaining quarters of 2015 as compared to the first quarter of 2015.

Cash (Used in) Provided by Financing Activities

<i>(in thousands)</i>	For the Three Months Ended March 31,	
	2015	2014
Activity related to convertible senior notes	\$ —	\$ 656,281
Activity related to stock-based compensation	6,467	33,236
Repurchases of common stock	(62,680)	(116,147)
Acquisition-related financing activities	—	(17,862)
Net cash (used in) provided by financing activities	\$ (56,213)	\$ 555,508

The decrease in cash provided by financing activities during the three-month period ended March 31, 2015 was primarily the result of the convertible senior notes issued in February 2014 and related note hedge and warrant transactions. Concurrent with the convertible senior notes issuance, we also repurchased \$62.0 million of our common stock, which contributed to the decrease in repurchases of common stock in the three-month period ended March 31, 2015 as compared to the same period in 2014.

In October 2013, the Board of Directors authorized a \$750.0 million share repurchase program, effective from October 16, 2013 through December 31, 2016. The goal of the October 2013 share repurchase program is to both offset dilution from our equity compensation plans and to provide the flexibility to increase distributions to our shareholders as business and market conditions warrant.

During the three-month period ended March 31, 2015, we repurchased 0.9 million shares of common stock at a weighted average price of \$67.24 per share for an aggregate of \$62.7 million. During the three-month period ended March 31, 2014, we repurchased 2.0 million shares of common stock at a weighted average price of \$58.77 per share for an aggregate of \$116.1 million. The timing and amount of any future share repurchases will be determined by our management based on its evaluation of market conditions and other factors.

Convertible Senior Notes

In February 2014, we issued \$690.0 million in par value of convertible senior notes due 2019 and entered into related convertible note hedge and warrant transactions. The terms of the notes, hedge and warrant transactions are discussed more fully in Note 5 to the consolidated financial statements included elsewhere in this quarterly report on Form 10-Q. We intend to use the net proceeds of the offering for share repurchases, working capital and general corporate purposes, including potential acquisitions and other strategic transactions.

In February 2014, we used \$62.0 million of the net proceeds from the convertible senior notes to repurchase 1.0 million shares of our common stock in accordance with the share repurchase program previously approved by our Board of Directors.

Liquidity Outlook

We believe, based on our present business plan, that our current cash, cash equivalents and marketable securities balances and our forecasted cash flows from operations will be sufficient to meet our foreseeable cash needs for at least the next 12 months. Our foreseeable cash needs include our planned capital expenditures, salaries related to increased hiring, investments in information technology and facility expansion costs, in addition to anticipated share repurchases, lease and purchase commitments, settlements of other long-term liabilities and potential acquisitions and other strategic transactions.

Contractual Obligations

Our principal commitments consist of obligations under leases for office space, service agreements with co-location facilities for data center capacity and bandwidth usage and open vendor purchase orders. Our minimum commitments related to bandwidth usage and co-location services may vary from period to period depending on the timing and length of contract renewals with our service providers. As of March 31, 2015, there have been no significant changes in our future non-cancelable minimum payments under these commitments from those reported in our annual report on Form 10-K for the year ended December 31, 2014, other than normal period-to-period variations.

Off-Balance Sheet Arrangements

We have entered into indemnification agreements with third parties, including vendors, customers, landlords, our officers and directors, shareholders of acquired companies, joint venture partners and third parties to which we license technology. Generally, these indemnification agreements require us to reimburse losses suffered by a third party due to various events, such as lawsuits arising from patent or copyright infringement or our negligence. These indemnification obligations are considered off-balance sheet arrangements in accordance with the authoritative guidance for guarantor's accounting and disclosure requirements for guarantees, including indirect guarantees of indebtedness of others. See also Note 10 to our consolidated financial statements included in our annual report on Form 10-K for the year ended December 31, 2014 for further discussion of these indemnification agreements. The fair value of guarantees issued or modified during the three months ended March 31, 2015 was determined to be immaterial.

As of March 31, 2015, we did not have any additional material off-balance sheet arrangements.

Legal Matters

We are conducting an internal investigation, with the assistance of outside counsel, relating to sales practices in a country outside the U.S. that represented less than 1% of our revenue during the quarter ended March 31, 2015, and in each of the years ended December 31, 2014, 2013 and 2012. The internal investigation includes a review of compliance with the requirements of the U.S. Foreign Corrupt Practices Act and other applicable laws and regulations by employees in that market. In February 2015, we voluntarily contacted the U.S. Securities and Exchange Commission and Department of Justice to advise both agencies of this internal investigation. We are cooperating with those agencies. As of the filing of this quarterly report on Form 10-Q, we cannot predict the outcome of this matter. No provision with respect to this matter has been made in our consolidated financial statements.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued updated guidance and disclosure requirements for recognizing revenue. The new revenue recognition standard provides a five-step analysis of transactions to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance is effective for the Company on January 1, 2017. However, in April 2015, the FASB proposed deferring the effective date for one year. This guidance may be applied retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. The Company is evaluating the potential impact of adopting this new accounting guidance.

In April 2015, the FASB issued updated guidance that will change the current presentation of debt issuance costs on the balance sheet. This new guidance will move debt issuance costs from the assets section of the balance sheet to the liabilities section as a direct deduction from the carrying amount of the debt issued. The guidance will be effective for the Company on January 1, 2016. The Company will reclassify its debt issuance costs included in other assets on the consolidated balance sheet to convertible senior notes within the liabilities and stockholders' equity section. The amount of deferred financing costs expected to be reclassified as of January 1, 2016 is \$6.2 million. This revision will have no impact on the Company's results of operations or cash flows.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

Our portfolio of cash equivalents and short- and long-term investments is maintained in a variety of securities, including U.S. government agency obligations, high-quality corporate debt securities, mutual funds and money market funds. Investments are classified as available-for-sale securities and carried at their fair market value with cumulative unrealized gains or losses recorded as a component of accumulated other comprehensive loss within stockholders' equity. A sharp rise in interest rates could have an adverse impact on the fair market value of certain securities in our portfolio. We do not currently hedge our interest rate exposure and do not enter into financial instruments for trading or speculative purposes.

Foreign Currency Risk

Growth in our international operations will incrementally increase our exposure to foreign currency fluctuations as well as other risks typical of international operations that could impact our business, including, but not limited to, differing economic conditions, changes in political climate, differing tax structures and other regulations and restrictions. Foreign exchange rate fluctuations may adversely impact our consolidated results of operations as exchange rate fluctuations on transactions denominated in currencies other than our functional currencies result in gains and losses that are reflected in our consolidated statements of income. To the extent the U.S. dollar weakens against foreign currencies, the translation of these foreign currency-denominated transactions will result in increased revenue and decreased operating expenses. Conversely, our revenue will decrease and our operating expenses will increase when the U.S. dollar strengthens against foreign currencies. We do not enter into financial instruments for trading or speculative purposes.

Transaction Exposure

We enter into short-term foreign currency forward contracts to offset foreign exchange gains and losses generated by the re-measurement of certain assets and liabilities recorded in non-functional currencies. Changes in the fair value of these derivatives, as well as re-measurement gains and losses, are recognized in our statements of income within other expense, net. Foreign currency transaction gains and losses from these forward contracts were determined to be immaterial during the three months ended March 31, 2015.

Translation Exposure

Foreign exchange rate fluctuations may adversely impact our consolidated financial condition as the assets and liabilities of our foreign operations are translated into U.S. dollars in preparing our consolidated balance sheet. These gains or losses are recognized as an adjustment to stockholders' equity which is reflected in our balance sheet as accumulated other comprehensive loss.

Credit Risk

Concentrations of credit risk with respect to accounts receivable are limited to certain customers to which we make substantial sales. Our customer base consists of a large number of geographically dispersed customers diversified across numerous industries. We believe that our accounts receivable credit risk exposure is limited. As of March 31, 2015, one customer had an accounts receivable balance of 10% or more of our accounts receivable. As of December 31, 2014, no customer had an accounts receivable balance of 10% or more of our accounts receivable. We believe that, at March 31, 2015, the concentration of credit risk related to accounts receivable was not significant.

Item 4. Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer (our principal executive officer and principal financial officer, respectively), evaluated the effectiveness of our disclosure controls and procedures as of March 31, 2015. The term “disclosure controls and procedures,” as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company’s management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosures. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of March 31, 2015, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended March 31, 2015 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

We are party to litigation that we consider routine and incidental to our business. We do not currently expect the results of any of these litigation matters to have a material adverse effect on our business, results of operations, financial condition, or cash flows.

Item 1A. Risk Factors

The following are important factors that could cause our actual operating results to differ materially from those indicated or suggested by forward-looking statements made in this quarterly report on Form 10-Q or presented elsewhere by management from time to time. We have not made any material changes to the risk factors previously disclosed in our annual report on Form 10-K for the year ended December 31, 2014.

If we do not continue to innovate and develop solutions and technologies that are useful for our customers or that improve our operating efficiencies, our operating results may suffer.

We have been in business for more than 15 years and consider ourselves pioneers in the development of content and application delivery solutions. As the information technology industry evolves, however, it may become increasingly difficult for us to maintain a technological advantage. In particular, our traditional offerings risk becoming commoditized as competitors or even current or former customers seek to replicate them such that we must lower the prices we charge, reducing the profitability of such offerings. We believe, therefore, that developing innovative, high-margin solutions is key to our revenue growth and profitability. We must do so in a rapidly changing technology environment where it can be difficult to anticipate the needs of potential customers and where competitors may develop products and services that are, or may be viewed as, better than ours. The process of developing new solutions is complex and uncertain; we must commit significant resources to developing new services or features without knowing whether our investments will result in services the market will accept. This could cause our expenses to grow more rapidly than our revenue. Furthermore, we may not successfully execute our technology initiatives because of errors in planning, timing or execution, technical or operational hurdles that we fail to overcome in a timely fashion, misunderstandings about market demand or a lack of appropriate resources. Failure to adequately develop, on a cost-effective basis, innovative new or enhanced solutions that are attractive to customers and to keep pace with rapid technological and market changes could have a material effect on our business, results of operations, financial condition and cash flows.

We believe that the Internet has the potential to experience dramatic growth in the future. For example, only a relatively small percentage of individuals watch television over the Internet now, but many predict that the Internet will become the dominant medium for delivery of video content in the future. In addition, the use of mobile devices has increased rapidly in

recent years and is expected to continue to grow in the future. There could develop an inflection point above which global usage of the Internet increases to a level that our current approaches to the delivery of content and applications may not be sustainable at current levels of profitability or at all. It is expensive to deploy dedicated servers in data centers around the world; therefore, that approach of deploying at the "edge" of the Internet may be inadequate to fully address our customer's evolving needs. If we are unable to develop or acquire scalable new technologies to address the expected growth and other changes we expect, our business and financial statements may suffer.

The information technology industry and the markets in which we compete are constantly evolving, which makes our future business strategies, practices and results difficult to predict.

The information technology industry and the markets in which we compete have grown rapidly over the life of our company and continue to evolve in response to new technological advances, changing business models and other factors. We and the other companies that compete in the industry and these markets experience continually shifting business relationships, commercial focuses and business priorities, all of which occur in reaction to industry and market forces and the emergence of new opportunities. These shifts have led or could lead to:

- our customers or partners becoming competitors;
- our network suppliers becoming partners with us or, conversely, no longer seeking to work with us;
- our working more closely with hardware providers;
- large technology companies that previously did not appear to show interest in the markets we seek to address entering into those markets as competitors; and
- our needing to expand into new lines of business.

As a result of this constantly changing environment, our future business strategies, practices and results may be difficult to predict, and we may face operational difficulties in adjusting to the changes.

If we are unable to compete effectively, our business will be adversely affected.

We compete in markets that are intensely competitive and rapidly changing. Our current and potential competitors vary by size, service offerings and geographic region and range from start ups that offer solutions competing with a discrete part of our business to large technology or telecommunications companies that offer, or may be planning to introduce, products and services that are broadly competitive with what we do. The primary competitive factors in our market are: excellence of technology, global presence, customer service, technical expertise, security, ease-of-use, breadth of services offered, price and financial strength. Competitors include some of our current partners and customers.

Many of our current and potential competitors have substantially greater financial, technical and marketing resources, larger customer bases, longer operating histories, greater brand recognition and more established relationships in the industry than we do. As a result, some of these competitors may be able to:

- develop superior products or services, gain greater market acceptance, and expand their service offerings more efficiently or more rapidly;
- adapt to new or emerging technologies and changes in customer requirements more quickly;
- take advantage of acquisition and other opportunities more readily;
- adopt more aggressive pricing policies and devote greater resources to the promotion, marketing, and sales of their services; and
- devote greater resources to the research and development of their products and services.

Smaller and more nimble competitors may be able to:

- attract customers by offering less-sophisticated versions of services than we provide at lower prices than those we charge;
- develop new business models that are disruptive to us; and
- respond more quickly than we can to new or emerging technologies and changes in customer requirements, resulting in superior offerings.

Existing and potential customers may not purchase our services, or may limit their use of them, because they:

- pursue a "do-it-yourself" approach by putting in place equipment, software and other technology solutions for content and application delivery within their internal systems;
- enter into relationships directly with network providers instead of relying on an overlay network like ours; or
- implement dual vendor policies to reduce reliance on external providers like us.

Consequently, our competitors include hardware manufacturers, software companies and other entities that offer Internet-related solutions that are not service-based.

Ultimately, increased competition of all types could result in price and revenue reductions, loss of customers and loss of market share, each of which could materially impact our business, profitability, financial condition, results of operations and cash flows.

We may be unable to replace lost revenue due to customer cancellations, renewals at lower rates or other less favorable terms.

It is key to our profitability that we offset lost committed recurring revenue due to customer cancellations, terminations, price reductions or other less favorable terms by adding new customers and increasing the number of high-margin services, features and functionalities that our existing customers purchase. We cannot predict our renewal rates. Some customers may elect not to renew and others may renew at lower prices, lower committed traffic levels, or for shorter contract lengths. Historically, a significant percentage of our renewals, particularly with larger customers, have involved unit price declines as competition has increased and the market for certain parts of our business has matured. Our renewal rates may decline as a result of a number of factors, including competitive pressures, customer dissatisfaction with our services, customers' inability to continue their operations and spending levels, the impact of dual vendor policies, customers implementing or increasing their use of in-house technology solutions and general economic conditions. In addition, our customer contracting models may change to move away from a committed revenue structure to a "pay-as-you" go approach. The absence of a commitment would make it easier for customers to stop doing business with us, which would increase the risk of lower revenue.

We may be unsuccessful at developing and maintaining strategic relationships with third parties that expand our distribution channels and increase revenue, which could significantly limit our long-term growth.

Our future success will likely require us to maintain and increase the number and depth of our relationships with resellers, systems integrators, product makers and other strategic partners and to leverage those relationships to expand our distribution channels and increase revenue. The need to develop such relationships can be particularly acute in areas outside of the U.S. We have not always been successful at developing these relationships due to the complexity of our services, our historical reliance on an internal sales force, a past lack of strategic focus on such arrangements and other factors. Recruiting and retaining qualified channel partners and training them in the use of our technology and services and ensuring that they are compliant with our ethical expectations requires significant time and resources. In order to develop and expand our distribution channel, we must continue to expand and improve our portfolio of solutions as well as the systems, processes and procedures that support our channels. Those systems, processes and procedures may become increasingly complex and difficult to manage. The time and expense required for the sales and marketing organizations of our channel partners to become familiar with our offerings, including our new services developments, may make it more difficult to introduce those products to enterprises. Our failure to maintain and increase the number and quality of relationships with channel partners, and any inability to successfully execute on the partnerships we initiate, could significantly impede our revenue growth prospects in the short and long term.

Numerous other factors could cause our revenue growth rate and profitability to decline.

Our revenue growth rate and profitability may decline in future periods as a result of a number of other factors, including:

- failure to experience traffic growth and increase sales of our core services and advanced features;
- changes in our customers' business models that we do not fully anticipate or that we fail to address adequately;
- customers, particularly larger media customers, implementing their own data centers and delivery approaches to limit their reliance on third party providers like us;
- macro-economic pressures; and

- failure of a significant number of customers to pay our fees on a timely basis or at all or failure to continue to purchase our services in accordance with their contractual commitments.

We plan our expense levels and investment on estimates of future revenue and future anticipated rate of growth. Many of our expenses are fixed cost in nature for some minimum amount of time, such as with co-location and bandwidth providers, so it may not be possible to reduce costs in a timely manner or without the payment of fees to exit certain obligations early. We also face higher expenses due to increased headcount and if customers shift significant amounts of their traffic to our secure socket layer, or SSL, network. Therefore, if our revenue does not increase as forecasted, we may not be able to maintain our current level of profitability in 2015 or on a quarterly or annual basis thereafter.

Security breaches and other unplanned interruptions in the functioning of our network or services could lead to significant costs and disruptions that could harm our business, financial results and reputation.

Our business is dependent on providing our customers with fast, efficient and reliable distribution of applications and content over the Internet. We transmit and store our customers' information and data as well as our own. Maintaining the security and availability of our services, network and internal IT systems is a critical issue for us and our customers. The costs to us to eliminate or alleviate cyber or other security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities are significant, and our efforts to address these problems may not be successful and could result in interruptions, delays, cessation of service and loss of existing or potential customers. As we expand our emphasis on selling security-related solutions, we may become a more attractive target for attacks on our infrastructure intended to steal information about our technology, financial data or customer information or take other actions that would be damaging to our customers and us. Our network or services could also be disrupted by numerous other events, including failure or refusal of our third party network providers to provide the necessary capacity, natural disasters, power losses and human error. Any significant breach of our security measures or other disruptions to our network or IT systems would threaten our ability to provide our customers with fast, efficient and reliable distribution of applications and content over the Internet, would harm our reputation and could lead to customer credits, loss of customers, higher expenses and increased legal liability.

Acquisitions and other strategic transactions we complete could result in operating difficulties, dilution, diversion of management attention and other harmful consequences that may adversely impact our business and results of operations.

Acquisitions are an important part of our corporate strategy. We may also enter into other types of strategic relationships that involve technology sharing or close cooperation with other companies. Acquisitions and other complex transactions are accompanied by a number of risks, including the following:

- the difficulty of integrating the operations and personnel of acquired companies;
- the potential disruption of our ongoing business;
- the potential distraction of management;
- expenses related to the transactions;
- increased accounting charges such as impairment of goodwill or intangible assets, amortization of intangible assets acquired and a reduction in the useful lives of intangible assets acquired; and
- potential unknown liabilities associated with acquired businesses.

Any inability to integrate completed acquisitions or combinations in an efficient and timely manner could have an adverse impact on our results of operations. As we complete acquisitions, we may encounter difficulty in incorporating acquired technologies into our offerings while maintaining the quality standards that are consistent with our brand and reputation. In addition, we may not be able to recognize any expected synergies or benefits in connection with a future acquisition, combination or strategic relationship. If we are not successful in completing acquisitions or other strategic transactions that we may pursue in the future, we may incur substantial expenses and devote significant management time and resources without a successful result. Future acquisitions could require use of substantial portions of our available cash or result in dilutive issuances of securities. Technology sharing or other strategic relationships we enter into may give rise to disputes over intellectual property ownership, operational responsibilities and other significant matters. Such disputes may be expensive and time-consuming to resolve.

Our failure to effectively manage our operations as our business evolves could harm us.

Our future operating results will depend on our ability to manage our operations. As a result of the diversification of our business, personnel growth, acquisitions and international expansion in recent years, many of our employees are now based outside of our Cambridge, Massachusetts headquarters; however, most key management decisions are made by a relatively small group of individuals based primarily at our headquarters. If we are unable to appropriately increase management depth, enhance succession planning and decentralize our decision-making at a pace commensurate with our actual or desired growth rates, we may not be able to achieve our financial or operational goals.

We have greatly increased our employee base in recent years and have brought in hundreds of new employees through acquisitions. It is important to our continued success that we hire qualified employees, properly train them and manage out poorly-performing personnel, all while maintaining our corporate culture and spirit of innovation. If we are not successful at these efforts, our growth and operations could be adversely affected.

As our business evolves, we must also expand and adapt our operational infrastructure. Our business relies on our data systems, billing systems and other operational and financial reporting and control systems. All of these systems have become increasingly complex due to the diversification and complexity of our business, acquisitions of new businesses with different systems and increased regulation over controls and procedures. To manage our technical support infrastructure effectively and improve our sales efficiency, we will need to continue to upgrade and improve our data systems, billing systems, ordering processes and other operational and financial systems, procedures and controls. These upgrades and improvements will require a dedication of resources, are likely to be complex and increasingly rely on hosted computer services from third parties that we do not control. If we are unable to adapt our systems and organization in a timely, efficient and cost-effective manner to accommodate changing circumstances, our business may be adversely affected. If the third parties we rely on for hosted data solutions for our internal network and information systems are subject to a security breach or otherwise suffer disruptions that impact the services we utilize, the integrity and availability of our internal information could be compromised causing the loss of confidential or proprietary information, damage to our reputation and economic loss.

We face risks associated with international operations and expansion efforts that could harm our business.

We have operations in numerous foreign countries and may continue to expand our sales and support operations internationally. Such expansion could require us to make significant expenditures, which could harm our profitability. We are increasingly subject to a number of risks associated with international business activities that may increase our costs, lengthen our sales cycle and require significant management attention. These risks include:

- currency exchange rate fluctuations and limitations on the repatriation and investment of funds;
- difficulties in transferring funds from, or converting currencies in, certain countries;
- unexpected changes in regulatory requirements;
- interpretations of laws or regulations that would subject us to regulatory supervision or, in the alternative, require us to exit a country, which could have a negative impact on the quality of our services or our results of operations;
- uncertainty regarding liability for content or services;
- adjusting to different employee/employer relationships and different regulations governing such relationships;
- corporate and personal liability for alleged or actual violations of laws and regulations;
- difficulty in staffing, developing and managing foreign operations as a result of distance, language and cultural differences;
- reliance on channel partners over which we have limited control or influence on a day-to-day basis; and
- potentially adverse tax consequences.

In addition, compliance with complex foreign and U.S. laws and regulations that apply to our international operations increases our cost of doing business. These numerous, rapidly-changing and sometimes conflicting laws and regulations include internal control and disclosure rules, data privacy and filtering requirements, anti-corruption laws, such as the U.S. Foreign Corrupt Practices Act, the UK Bribery Act and local laws prohibiting corrupt payments to governmental officials, and antitrust and competition regulations, among others. Violations of these laws and regulations by our employees or partners could result in fines and penalties, criminal sanctions against us, our officers, or our employees, prohibitions on the conduct of our business and on our ability to offer our products and services in one or more countries, and could also materially affect our brand, our international expansion efforts, our ability to attract and retain employees, our business, and our financial statements. Although we have implemented policies and procedures designed to ensure compliance with these laws and regulations, there can be no assurance that our employees, contractors or agents will not violate our policies or applicable laws.

In particular, we are conducting an internal investigation, with the assistance of outside counsel, relating to sales practices in a country outside the U.S. The investigation includes a review of compliance with the requirements of the U.S. Foreign Corrupt Practices Act and other applicable laws and regulations by employees in that market. If violations are found, we may be subject to penalties, which could include substantial fines.

Defects or disruptions in our services could diminish demand for our solutions and subject us to substantial liability.

Our services are highly complex and are designed to be deployed in and across numerous large and complex networks that we do not control. From time to time, we have needed to correct errors and defects in the software that underlies our services and platform. We have also experienced customer dissatisfaction with the quality of some of our media delivery services which has led to loss of business and could lead to loss of customers in the future. There may be additional errors and defects in our software that may adversely affect our operations. We may not have in place adequate quality assurance procedures to ensure that we detect errors in our software in a timely manner, and we may have insufficient resources to efficiently cope with multiple service incidents happening simultaneously or in rapid succession. If we are unable to efficiently and cost-effectively fix errors or other problems that may be identified and improve the quality of our services, or if there are unidentified errors that allow persons to improperly access our services, we could experience loss of revenue and market share, damage to our reputation, increased expenses, delayed payments and legal actions by our customers. If we elect to move into new areas that involve legal and regulatory complexities such as monetizing data, providing regulated telecommunications services, or handling personally identifiable information, the potential risks we face and magnitude of losses could increase.

We may have insufficient transmission and co-location space, which could result in disruptions to our services and loss of revenue.

Our operations are dependent in part upon transmission capacity provided by third party telecommunications network providers and access to co-location facilities to house our servers. There can be no assurance that we are adequately prepared for unexpected increases in bandwidth demands by our customers. The bandwidth we have contracted to purchase may become unavailable for a variety of reasons, including payment disputes, network providers going out of business, networks imposing traffic limits or governments adopting regulations that impact network operations. In some regions, network providers may choose to compete with us and become unwilling to sell us adequate transmission capacity at fair market prices. This risk is heightened where market power is concentrated with one or a few major networks. We also may be unable to move quickly enough to augment capacity to reflect growing traffic demands. Failure to put in place the capacity we require could result in a reduction in, or disruption to, service to our customers and ultimately loss of those customers. In recent years, it has become increasingly expensive to house our servers at network facilities. We expect this trend to continue. In addition, customers have increasingly elected to transmit their content over our SSL network, which is more costly for us to operate and could require significant additional investment for us. These increased expenses have made, and will make, it more costly for us to expand our operations and more difficult for us to maintain or improve our profitability.

Government regulation is evolving, and unfavorable changes could harm our business.

Laws and regulations that apply to communications and commerce over the Internet are becoming more prevalent. In particular, domestic and foreign government attempts to regulate the operation of the Internet through net neutrality rules or other legislation, treaties or regulations could negatively impact our business even if our business is not the direct target of such regulations. Furthermore, the growth and development of the market for online commerce has prompted calls for more stringent copyright protection, tax, consumer protection, cybersecurity, content, anti-discrimination and privacy laws, both in the U.S. and abroad, that may impose additional burdens on companies conducting business online or providing Internet-related services such as ours. The adoption of any of these measures could negatively affect both our business directly as well as the businesses of our customers, which could reduce their demand for our services.

Fluctuations in foreign currency exchange rates affect our operating results in U.S. dollar terms.

An increasing portion of our revenue is derived from international operations. Revenue generated and expenses incurred by our international subsidiaries are often denominated in the currencies of the local countries. As a result, our consolidated U.S. dollar financial statements are subject to fluctuations due to changes in exchange rates as the financial results of our international subsidiaries are translated from local currencies into U.S. dollars. In addition, our financial results are subject to changes in exchange rates that impact the settlement of transactions in non-functional currencies. While we have implemented a foreign currency hedging program to mitigate transactional exposures, there is no guarantee that such program will be fully effective.

Our stock price has been, and may continue to be, volatile, and your investment could lose value.

The market price of our common stock has been volatile. Trading prices may continue to fluctuate in response to a number of events and factors, including the following:

- quarterly variations in operating results;
- introduction of new products, services and strategic developments by us or our competitors;
- market speculation about whether we are a takeover target;
- changes in financial estimates and recommendations by securities analysts;
- failure to meet the expectations of securities analysts;
- purchases or sales of our stock by our officers and directors;
- macro-economic factors;
- repurchases of shares of our common stock;
- performance by other companies in our industry; and
- geopolitical conditions such as acts of terrorism or military conflicts.

Furthermore, our revenue, particularly those attributable to usage of our services beyond customer commitments, can be difficult to forecast, and, as a result, our quarterly operating results can fluctuate substantially. This concern is particularly acute with respect to our media and commerce customers for which holiday sales are a key but unpredictable driver of usage of our services. In the future, our customer contracting models may change to move away from a committed revenue structure to a "pay-as-you" go approach. The absence of a commitment would make it easier for customers to stop doing business with us, which would create additional challenges with our forecasting processes. Because a significant portion of our cost structure is largely fixed in the short-term, revenue shortfalls tend to have a disproportionately negative impact on our profitability. If we announce revenue or profitability results that do not meet or exceed our guidance or make changes in our guidance with respect to future operating results, our stock price may decrease significantly in reaction.

Any of these events, as well as other circumstances discussed in these Risk Factors, may cause the price of our common stock to fall. In addition, the stock market in general, and the market prices of stock of publicly-traded technology companies in particular, have experienced significant volatility that often has been unrelated to the operating performance of such companies. These broad market and industry fluctuations may adversely affect the market price of our common stock, regardless of our operating performance.

Any failure to meet our debt obligations would damage our business.

As of March 31, 2015, we had total par value of \$690.0 million of convertible senior notes outstanding. Our ability to refinance the notes, make cash payments in connection with conversions of the notes or repurchase those notes in the event of a fundamental change (as defined in the indenture governing the notes) will depend on market conditions and our future performance, which is subject to economic, financial, competitive and other factors beyond our control. We also may not use the cash we have raised through the issuance of the convertible senior notes in an optimally productive and profitable manner. If we are unable to remain profitable or if we use more cash than we generate in the future, our level of indebtedness at such time could adversely affect our operations by increasing our vulnerability to adverse changes in general economic and industry conditions and by limiting or prohibiting our ability to obtain additional financing for additional capital expenditures, acquisitions and general corporate and other purposes. In addition, if we are unable to make cash payments upon conversion of the notes we would be required to issue significant amounts of our common stock, which would be dilutive to the stock of existing stockholders. If we do not have sufficient cash to repurchase the notes following a fundamental change we would be in default under the terms of the notes, which could seriously harm our business. In addition, the terms of the notes do not limit the amount of future indebtedness we may incur. If we incur significantly more debt, this could intensify the risks described above.

We may issue additional shares of our common stock or instruments convertible into shares of our common stock and thereby materially and adversely affect the market price of our common stock.

Our Board of Directors has the authority to issue additional shares of our common stock or other instruments convertible into, or exchangeable or exercisable for, shares of our common stock. If we issue additional shares of our common stock or instruments convertible into shares of our common stock, it may materially and adversely affect the market price of our common stock.

If we are unable to retain our key employees and hire and retain qualified sales, technical, marketing and support personnel, our ability to compete could be harmed.

Our future success depends upon the services of our executive officers and other key technology, sales, marketing and support personnel who have critical industry experience and relationships. There is significant competition for talented individuals in the regions in which our primary offices are located, which affects both our ability to retain key employees and hire new ones. In making employment decisions, particularly in our industry, job candidates and current personnel often consider the value of stock-based compensation they are to or currently receive in connection with their employment. Declines in the price of our stock could adversely affect our ability to attract or retain key employees and result in increased employee compensation expenses.

None of our officers or key employees is bound by an employment agreement for any specific term. Members of our senior management team have left Akamai over the years for a variety of reasons, and we cannot be certain that there will not be additional departures, which may be disruptive to our operations and detrimental to our future outlook. The loss of the services of any of our key employees or our inability to attract and retain new talent could hinder or delay the implementation of our business model and the development and introduction of, and negatively impact our ability to sell, our services.

We may become involved in litigation that may adversely impact our business.

From time to time, we are or may become involved in various legal proceedings relating to matters incidental to the ordinary course of our business, including patent, commercial, product liability, employment, class action, whistleblower and other litigation and claims, and governmental and other regulatory investigations and proceedings. Such matters can be time-consuming, divert management's attention and resources and cause us to incur significant expenses. Furthermore, because such matters are inherently unpredictable, there can be no assurance that the results of any of these matters will not have an adverse impact on our business, results of operations, financial condition, or cash flows.

We may need to defend against patent or copyright infringement claims, which would cause us to incur substantial costs or limit our ability to use certain technologies in the future.

As we expand our business and develop new technologies, products and services, we may become increasingly subject to intellectual property infringement and other claims, including those that may arise under international laws. In many cases, we have agreed to indemnify our customers and channel and strategic partners if our services infringe or misappropriate specified intellectual property rights; therefore, we could become involved in litigation or claims brought against customers or strategic partners if our services or technology are the subject of such allegations. Any litigation or claims, whether or not valid, brought against us or pursuant to which we indemnify our customers or channel or strategic partners could result in substantial costs and diversion of resources and require us to do one or more of the following:

- cease selling, incorporating or using features, functionalities, products or services that incorporate the challenged intellectual property;
- pay substantial damages and incur significant litigation expenses;
- obtain a license from the holder of the infringed intellectual property right, which license may not be available on reasonable terms or at all; or
- redesign products or services.

If we are forced to take any of these actions, our business may be seriously harmed.

Our business will be adversely affected if we are unable to protect our intellectual property rights from unauthorized use or infringement by third parties.

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. These legal protections afford only limited protection. We have previously brought lawsuits against entities that we believed were infringing our intellectual property rights but have not always prevailed. Such lawsuits can be expensive and require a significant amount of attention from our management and technical personnel, and the outcomes are unpredictable. In 2014, the U.S. Supreme Court ruled against us in a case involving claims under one of our patents. There can be no assurance that evolving interpretations of patent laws in the U.S. and other countries will not limit the scope and enforceability and, therefore, the value of our patents. Monitoring unauthorized use of our services is difficult, and we cannot be certain that the steps we have taken or will take will prevent unauthorized use of our technology. Furthermore, we cannot be certain that any pending or future patent applications will be granted, that any future patent will not be challenged, invalidated or circumvented, or that rights granted under any patent that may be issued will provide competitive advantages to us. If we are unable to protect our proprietary rights from unauthorized use, the value of our intellectual property assets may be reduced. Although we have licensed from other parties proprietary technology covered by patents, we cannot be certain that any such patents will not be challenged, invalidated or circumvented. Such licenses may also be non-exclusive, meaning our competition may also be able to access such technology.

If our license agreement with MIT terminates, our business could be adversely affected.

We have licensed from the Massachusetts Institute of Technology, or MIT, technology that is covered by various patents and copyrights relating to Internet content delivery technology. Some of our core technology is based in part on the technology covered by these patents, patent applications and copyrights. Our license is effective for the life of the patents and patent applications; however, under limited circumstances, such as a cessation of our operations due to our insolvency or our material breach of the terms of the license agreement, MIT has the right to terminate our license. A termination of our license agreement with MIT could have a material adverse effect on our business. These patents are scheduled to expire beginning in 2018. As the patents expire, we will no longer have the right to exclude others from practicing the technologies covered by them.

We rely on certain “open-source” software the use of which could result in our having to distribute our proprietary software, including our source code, to third parties on unfavorable terms, which could materially affect our business.

Certain of our service offerings use software that is subject to open-source licenses. Open-source code is software that is freely accessible, usable and modifiable. Certain open-source code is governed by license agreements, the terms of which could require users of such software to make any derivative works of the software available to others on unfavorable terms or at no cost. Because we use open-source code, we may be required to take remedial action in order to protect our proprietary software. Such action could include replacing certain source code used in our software, discontinuing certain of our products or taking other actions that could be expensive and divert resources away from our development efforts. In addition, the terms relating to disclosure of derivative works in many open-source licenses are unclear. If a court interprets one or more such open-source licenses in a manner that is unfavorable to us, we could be required to make certain of our key software available at no cost.

If our ability to deliver media files in popular proprietary content formats were to become restricted or cost-prohibitive, demand for our content delivery services could decline, we could lose customers and our financial results could suffer.

Significant portions of our business depend on our ability to deliver media content in all major formats such as those used by companies like Adobe, Microsoft, Apple and Google. Owners of proprietary content formats may be able to block, restrict or impose fees or other costs on our use of such formats, which could lead to additional expenses for us and for our customers, or which could prevent our delivery of this type of content altogether. Such interference could result in a loss of existing customers, increased costs and impairment of our ability to attract new customers, which would harm our revenue, operating results and growth.

The potential exhaustion of the supply of unallocated IPv4 addresses and the inability of Akamai and other Internet users to successfully transition to IPv6 could harm our operations and the functioning of the Internet as a whole, thereby negatively affecting our business.

An Internet Protocol address, or IP address, is a numerical label that is assigned to any device connecting to the Internet. Today, the functioning of the Internet is dependent on the use of Internet Protocol version 4, or IPv4, the fourth version of the Internet Protocol, which uses 32-bit addresses. We currently rely on the acquisition of IP addresses for the functioning and expansion of our network and expect such reliance to continue in the future. There are, however, only a finite number of IPv4 addresses. The supply of unallocated IPv4 addresses is likely to be exhausted in the near future. Internet Protocol version 6, or IPv6, uses 128-bit addresses and has been designed to succeed IPv4 and alleviate the expected exhaustion of unallocated addresses under that version. While IPv4 and IPv6 will co-exist for some period of time, eventually all Internet users and companies will need to transition to IPv6. There can be no guarantee that the plans we have been developing for the transition to IPv6 will be effective. If we are unable to obtain the IPv4 addresses we need, on financial terms acceptable to us or at all, before we or other entities that rely on the Internet can transition to IPv6, our current and future operations could be materially harmed. If there is not a timely and successful transition to IPv6 by Internet users generally, the Internet could function less effectively, which could damage numerous businesses, the economy generally and the prospects for future growth of the Internet as a medium for transacting business. This could, in turn, be harmful to our financial condition, results of operations and cash flows.

If the accounting estimates we make, and the assumptions on which we rely, in preparing our financial statements prove inaccurate, our actual results may be adversely affected.

Our financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires us to make estimates and judgments about, among other things, taxes, revenue recognition, stock-based compensation costs, capitalization of internal-use software development costs, investments, contingent obligations, allowance for doubtful accounts, intangible assets and restructuring charges. These estimates and judgments affect, among other things, the reported amounts of our assets, liabilities, revenue and expenses, the amounts of charges accrued by us, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. If our estimates or the assumptions underlying them are not correct, actual results may differ materially from our estimates and we may need to, among other things, accrue additional charges that could adversely affect our results of operations, which in turn could adversely affect our stock price. In addition, new accounting pronouncements and interpretations of accounting pronouncements have occurred and may occur in the future that could adversely affect our reported financial results.

We may have exposure to greater-than-anticipated tax liabilities.

Our future income taxes could be adversely affected by earnings being lower than anticipated in jurisdictions that have lower statutory tax rates and higher than anticipated in jurisdictions that have higher statutory tax rates, or changes in tax laws, regulations, or accounting principles, as well as certain discrete items such as equity-related compensation. We have recorded certain tax reserves to address potential exposures involving our income, sales and use and franchise tax positions. These potential tax liabilities result from the varying application of statutes, rules, regulations and interpretations by different jurisdictions. Our reserves, however, may not be adequate to cover our total actual liability. Although we believe our estimates, our reserves and the positions we have taken are reasonable, the ultimate tax outcome may differ from the amounts recorded in our financial statements and may materially affect our financial results in the period or periods for which such determination is made.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud. As a result, our stockholders could lose confidence in our financial reporting, which could harm our business and the trading price of our common stock.

We have complied with Section 404 of the Sarbanes-Oxley Act of 2002 by assessing, strengthening and testing our system of internal controls. Even though we concluded our internal control over financial reporting and disclosure controls and procedures were effective as of the end of the period covered by this report, we need to continue to maintain our processes and systems and adapt them to changes as our business evolves and we rearrange management responsibilities and reorganize our business accordingly. This continuous process of maintaining and adapting our internal controls and complying with Section 404 is expensive and time-consuming and requires significant management attention. We cannot be certain that our internal control measures will continue to provide adequate control over our financial processes and reporting and ensure compliance with Section 404. Furthermore, as our business changes, including by expanding our operations in different markets, increasing reliance on channel partners and completing acquisitions, our internal controls may become more complex and we will require significantly more resources to ensure our internal controls remain effective. Failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to meet our reporting obligations. If we or our independent registered public accounting firm identify material weaknesses, the disclosure of that fact, even if quickly remediated, could reduce the market's confidence in our financial statements and harm our stock price.

Changes in regulations or user concerns regarding privacy and protection of user data could adversely affect our business.

Federal, state, foreign and international laws and regulations may govern the collection, use, retention, sharing and security of data that we receive from our customers, visitors to their websites and others. In addition, we have a publicly-available privacy policy concerning collection, use and disclosure of user data. Any failure, or perceived failure, by us to comply with our posted privacy policies or with any privacy-related laws, government regulations or directives, or industry self-regulatory principles could result in damage to our reputation or proceedings or actions against us by governmental entities or others, which could potentially have an adverse effect on our business.

A large number of legislative proposals pending before the U.S. Congress, various state legislative bodies and foreign governments concern data privacy and retention issues related to our business. It is not possible to predict whether, when, or the extent to which such legislation may be adopted. In addition, the interpretation and application of user data protection laws are currently unsettled. These laws may be interpreted and applied inconsistently from jurisdiction to jurisdiction and inconsistently with our current data protection policies and practices. Complying with potentially varying international requirements could cause us to incur substantial costs or require us to change our business practices in a manner adverse to our business.

Our sales to government clients subject us to risks including early termination, audits, investigations, sanctions and penalties.

We have customer contracts with the U.S. government, as well as foreign, state and local governments and their respective agencies. Such government entities often have the right to terminate these contracts at any time, without cause. There is increased pressure for governments and their agencies, both domestically and internationally, to reduce spending. Most of our government contracts are subject to legislative approval of appropriations to fund the expenditures under these contracts. These factors combine to potentially limit the revenue we derive from government contracts in the future. Additionally, government contracts generally have requirements that are more complex than those found in commercial enterprise agreements and therefore more costly to comply with. Such contracts are also subject to audits and investigations that could result in civil and criminal penalties and administrative sanctions, including termination of contracts, refund of a portion of fees received, forfeiture of profits, suspension of payments, fines and suspensions or debarment from future government business.

General global market and economic conditions may have an adverse impact on our operating performance, results of operations and cash flows.

Our business has been and could continue to be affected by general global economic and market conditions. Weakness in the U.S. and/or in economies outside the U.S. could have a negative effect on our operating results, including decreases in revenue and operating cash flows. To the extent economic conditions impair our customers' ability to profitably monetize the content we deliver on their behalf, they may reduce or eliminate the traffic we deliver for them. Such reductions in traffic would lead to a reduction in our revenue. Additionally, in a down-cycle economic environment, we may experience the negative effects of increased competitive pricing pressure, customer loss, a slow down in commerce over the Internet and corresponding decrease in traffic delivered over our network and failures by customers to pay amounts owed to us on a timely basis or at all. Suppliers on which we rely for servers, bandwidth, co-location and other services could also be negatively impacted by economic conditions that, in turn, could have a negative impact on our operations or expenses. There can be no assurance, therefore, that current economic conditions or worsening economic conditions or a prolonged or recurring recession will not have a significant adverse impact on our operating results.

Global climate change regulations could adversely impact our business.

Our deployed network of servers consumes significant energy resources, including those generated by the burning of fossil fuels. In response to concerns about global climate change, governments may adopt new regulations affecting the use of fossil fuels or requiring the use of alternative fuel sources. In addition, our customers may require us to take steps to demonstrate that we are taking ecologically responsible measures in operating our business. It is possible that future regulatory or legislative initiatives or customer demands could affect the costs of operating our network of servers and our other operations. Such costs and any expenses we incur to make our network more energy efficient could make us less profitable in future periods. Failure to comply with applicable laws and regulations or other requirements imposed on us could lead to fines, lost revenue and damage to our reputation.

Our business could be adversely impacted as a result of war, acts of terrorism, natural disasters or climate change.

Terrorist acts, acts of war, natural disasters, or the direct and indirect effects of climate change (such as sea level rise, increased storm severity, drought, flooding, wildfires, pandemics and social unrest from resource depletion and rising food prices) may cause damage or disruption to our employees, facilities, customers, partners, suppliers, distributors and resellers, which could have an adverse impact on our business, results of operations and financial condition.

Because we do not intend to pay dividends, stockholders will benefit from an investment in our stock only if it appreciates in value.

We currently intend to retain our future earnings, if any, for use in the operation of our business and do not expect to pay any cash dividends in the foreseeable future on our stock. As a result, the success of an investment in our stock will depend upon any future appreciation in its value. There is no guarantee that our stock will appreciate in value or even maintain the price at which stockholders have purchased their shares.

Provisions of our charter, by-laws and Delaware law may have anti-takeover effects that could prevent a change in control even if the change in control would be beneficial to our stockholders.

Provisions of our charter, by-laws and Delaware law could make it more difficult for a third party to control or acquire us, even if doing so would be beneficial to our stockholders. These provisions include:

- a classified board structure so that only approximately one-third of our board of directors is up for re-election in any one year;
- our board of directors has the right to elect directors to fill a vacancy created by the expansion of the board of directors or the resignation, death or removal of a director;
- stockholders must provide advance notice to nominate individuals for election to the board of directors or to propose matters that can be acted upon at a stockholders' meeting; and
- our board of directors may issue, without stockholder approval, shares of undesignated preferred stock.

Further, as a Delaware corporation, we are also subject to certain Delaware anti-takeover provisions. Under Delaware law, a corporation may not engage in a business combination with any holder of 15% or more of its capital stock unless the

holder has held the stock for three years or, among other things, the board of directors has approved the transaction. Our board of directors could rely on Delaware law to prevent or delay an acquisition of us.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) Issuer Purchases of Equity Securities

The following is a summary of our repurchases of our common stock in the first quarter of 2015 (in thousands, except share and per share data):

Period ⁽¹⁾	(a) Total Number of Shares Purchased ⁽²⁾	(b) Average Price Paid per Share ⁽³⁾	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽⁴⁾	(d) Approximate Dollar Value of Shares that May Yet be Purchased Under Plans or Programs ⁽⁴⁾
January 1, 2015 – January 31, 2015	217,317	\$ 61.05	217,317	\$ 420,366
February 1, 2015 – February 28, 2015	189,966	63.41	189,966	408,321
March 1, 2015 – March 31, 2015	524,848	71.20	524,848	370,953
Total	932,131	\$ 67.24	932,131	\$ 370,953

(1) Information is based on settlement dates of repurchase transactions.

(2) Consists of shares of our common stock, par value \$0.01 per share. All repurchases were made pursuant to a previously-announced program.

(3) Includes commissions paid.

(4) In October 2013, the Board of Directors authorized a \$750.0 million share repurchase program, effective from October 16, 2013 through December 31, 2016. The share repurchase program was announced on October 23, 2013.

Item 6. Exhibits

The exhibits filed as part of this quarterly report on Form 10-Q are listed in the exhibit index immediately preceding the exhibits and are incorporated herein.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Akamai Technologies, Inc.

U.S. Non-Qualified Deferred Compensation Plan

FOREWORD

This Akamai Technologies, Inc. U.S. Non-Qualified Deferred Compensation Plan (the “Plan”) is effective January 1, 2015 (the “Effective Date”) and is adopted for the benefit of certain of its United States employees. The Plan was amended by the First Amendment, effective January 1, 2015, and such amendment is reflected in this document.

The Plan is intended to be an unfunded plan of deferred compensation primarily for the benefit of a select group of management or highly compensated employees.

The purpose of the Plan is to permit those employees of the Company who are part of a select group of U.S. management or highly compensated employees to defer, pursuant to the provisions of the Plan, a portion of the salaries, bonuses and other remuneration otherwise payable to them.

ARTICLE I Definitions

Section 1.1 “Account” or “Accounts” means the bookkeeping account or accounts established under the Plan, if any, on behalf of a Participant and includes earnings credited thereon or losses charged thereto.

Section 1.2 “Annual Open Enrollment Period” means such annual period as the Committee determines in its discretion which ends no later than December 31 of any given year, during which a Participant may make or change deferral and/or distribution elections under this Plan, in accordance with its terms, for the next following Plan Year.

Section 1.3 “Base Salary” means the base salary paid to Participants each Plan Year and as is reflected in a Participant’s W-2 Form, except that those elements of compensation that are listed on Exhibit I (attached hereto and incorporated herein) are not included as part of compensation in “Base Salary.” To avoid doubt, the limitation on compensation set forth under Code Section 401(a)(17) shall not apply with respect to Base Salary in this Plan.

Section 1.4 “Beneficiary” or “Beneficiaries” means the beneficiary or beneficiaries who, pursuant to the provisions of this Plan, is or are to receive the amount, if any, payable under this Plan upon the death of a Participant. Participants may designate a Beneficiary or Beneficiaries on a form or in a manner established by the Company.

Section 1.5 “Board” means the Board of Directors of the Company.

Section 1.6 “Bonus” means the annual bonus payable under the Company’s cash incentive plan in which a Participant participates such as the Annual Performance Bonus Program and the Executive Bonus Plan or such other similar annual performance bonus program. To avoid doubt, the term “Bonus” as used in this Plan will not include any payment made under the Incentive Compensation Plan, or any one-time, non-recurring bonus payment including without limitation any sign-on bonus, referral bonus, on-call bonus,

spot awards SPIFFs and “One-Time Payments” (each as defined in the Incentive Compensation Plan) or other one-time bonus payments or any payments listed as excluded on Exhibit I.

Section 1.7 “Change in Control” of the Company has the meaning as set forth in the Akamai Technologies, Inc. 2013 Stock Incentive Plan or any successor plan; provided that, at all times a Change in Control shall be determined in a manner consistent with the requirements of Section 409A of the Code.

Section 1.8 “Code” means the Internal Revenue Code of 1986, as amended, or any successor statute.

Section 1.9 “Committee” means the Akamai Technologies U.S. Retirement Plan Administrative Committee, which is responsible for administering the Plan or such other committee to which the Board may delegate such duties. The Committee may delegate pursuant to a written authorization (including, by way of illustration, through a Committee meeting minute entry, memorandum, or other written delegation document) any or all of its responsibilities involving ongoing day-to-day administration or ministerial acts, as set forth in this Plan to one or more individuals. In any case where this Plan refers to the Committee, such reference is deemed to be a reference to any delegate of the Committee appointed for such purpose.

Section 1.10 “Company” means Akamai Technologies, Inc. (including its wholly owned direct and indirect subsidiaries), and any successor to such corporation by merger, purchase or otherwise.

Section 1.11 “Company Matching Credits” means the amounts credited to a Participant’s Company Matching Credit Account, if any, pursuant to Section 3.3.

Section 1.12 “Company Matching Credit Account” means the bookkeeping account established under Section 3.3, if any, on behalf of a Participant and includes any earnings credited thereon or losses charged thereto pursuant to Article IV.

Section 1.13 “Deferral Election” means the Participant’s election to participate in this Plan and defer amounts eligible for deferral in accordance with the Plan terms. Except as the context otherwise requires, references herein to Deferral Elections include any subsequent modifications of a prior Deferral Election.

Section 1.14 “Deferred Bonus” means the amount of a Participant’s Bonus that such Participant has elected to defer until a later year pursuant to an election under Section 3.2.

Section 1.15 “Deferred Bonus Account” means the bookkeeping account established under Section 3.2 on behalf of a Participant, and includes any earnings credited thereon or losses charged thereto pursuant to Article IV.

Section 1.16 “Deferred Bonus Election” means the election by a Participant under Section 3.2 to defer a portion of a Bonus payment until a later year.

Section 1.17 “Deferred Salary” means the amount of a Participant’s Base Salary that such Participant has elected to defer until a later year pursuant to an election under Section 3.1.

Section 1.18 “Deferred Salary Account” means the bookkeeping account established under Section 3.1 on behalf of a Participant, and includes any earnings credited thereon or losses charged thereto pursuant to Article IV.

Section 1.19 “Deferred Salary Election” means the election by a Participant under Section 3.1 to defer until a later year a portion of his or her Base Salary.

Section 1.20 “Disability” means a Participant’s total disability as defined below and determined in a manner consistent with Code Section 409A and the regulations thereunder:

- (i) The Participant is unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months; or
- (ii) The Participant is, by reason of any medically determinable physical or mental impairment that can be expected to result in death or can be expected to last for a continuous period of not less than 12 months, receiving income replacement benefits for a period of not less than three months under an accident and health plan covering employees of the Company.

A Participant will be deemed to have suffered a Disability if determined to be totally disabled by the Social Security Administration. A Participant who meets the definitional requirements for disability will be referred to as “Disabled” herein.

Section 1.21 “ERISA” means the Employee Retirement Income Security Act of 1974, as amended, or any successor statute.

Section 1.22 “401(k) Plan” means the Akamai Technologies, Inc. 401(k) Plan as it may be from time-to-time amended.

Section 1.23 “Incentive Compensation Plan” means the Akamai Worldwide Sales Incentive Compensation Plan or such similar plan sponsored by the Company.

Section 1.24 “Investment Election” means the Participant’s election to have deferred amounts credited with hypothetical earnings credits (or losses) that track the investment performance of the Investment Options in accordance with Article IV.

Section 1.25 “Investment Options” means those hypothetical targeted investment options designated by the Committee as measurements of the rate of return to be credited to (or charged against) amounts deferred to Participants’ Accounts.

Section 1.26 “Participant” means a United States common law employee of the Company who meets the eligibility and participation requirements set forth in Article II.

Section 1.27 “Plan” means this Akamai Technologies, Inc. U.S. Non-Qualified Deferred Compensation Plan.

Section 1.28 “Plan Year” means the calendar year.

Section 1.29 “Separation from Service” means a termination of employment or other separation from service from the Company as described in Code Section 409A and the regulations thereunder.

Section 1.30 “Spouse” means the individual to whom a Participant is legally married under applicable state law and as further determined in accordance with Revenue Ruling 2013-17.

Section 1.31 “Unforeseeable Emergency” means a severe financial hardship to the Participant resulting from an illness or accident of the Participant, the Participant’s Spouse, the Participant’s beneficiary, or the Participant’s dependent (as defined in Code Section 152, without regard to section 152(b)(1), (b)(2), and (d)(1)(B)); loss of the Participant’s property due to casualty (including the need to rebuild a home following damage to a home not otherwise covered by insurance); or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant; provided that, at all times an Unforeseeable Emergency shall be determined in a manner consistent with the requirements of Section 409A of the Code.

ARTICLE II

Eligibility and Participation

Section 2.1 Eligibility.

(a) Only United States common law employees identified as Participants by the Committee shall be eligible to participate in this Plan.

(b) An employee who, at any time, ceases to meet the eligibility requirements determined in the sole discretion of the Committee shall thereafter cease to be a Participant eligible to continue making deferrals under the Plan, effective as of the first day of the next Plan Year, unless the Committee, solely in its discretion, determines that deferrals should be discontinued on an earlier date, in a manner consistent with the requirements of Code Section 409A and the regulations and other guidance issued thereunder to avoid adverse tax consequences to affected Participants.. In such case, the individual may remain a Participant in the Plan with respect to amounts already allocated prior to the date such individual ceased to be an active Participant.

Section 2.2 Participation.

(a) General Rule. An eligible employee shall become an active Participant in the Plan at such time as he or she makes a timely Deferral Election pursuant to Subsections (b) and (c) herein.

(b) Deferral Election. The Committee shall provide Participants with the appropriate election forms with which to make a Deferral Election. Participants shall make Deferral Elections in the manner set forth in Section 2.2(c) and within the time periods set forth in Article III. All Deferral Elections hereunder (including any modifications of prior Deferral Elections otherwise permitted under the Plan) may be made in accordance with written, electronic or telephonic procedures prescribed by the Committee.

(c) Contents of Deferral Election. A Participant’s Deferral Election must be made in the manner designated by the Committee and must be accompanied by:

(i) any election to defer Base Salary and/or Bonus;

(ii) a single designation as to the time and form of distribution for each Plan Year’s Deferral Election (i.e., with respect to Base Salary and Bonus) and Company Matching Credits; provided that, if no specific election is made with respect to any amount credited under this Plan, the

Participant will be deemed to have elected to receive such Plan Year allocations upon Separation from Service in the form of a lump sum distribution; and

(iii) such additional information as the Committee deems necessary or appropriate.

(d) The participation of any Participant may be suspended or terminated by the Committee at any time, but no such suspension or termination shall operate to reduce any benefits accrued by the Participant under the Plan prior to the date of suspension or termination and, further, any such suspension or termination may only be done in a manner consistent with the requirements of Code Section 409A and the regulations and other guidance issued thereunder to avoid adverse tax consequences to affected Participants.

ARTICLE III **Deferral Elections and Deferral Periods**

Section 3.1 Deferred Salary Election.

(a) Each Participant may make a Deferred Salary Election with respect to Base Salary otherwise to be paid in the next following Plan Year. A Participant may elect to defer from 1% to 50% of the Participant's Base Salary (in increments of 1%). Notwithstanding the foregoing, any Deferred Salary Election must be made (or if not made will be construed) in a manner that will ensure that the Participant is paid a sufficient amount of Base Salary that will allow adequate amounts available for (i) satisfaction of all required withholdings, including without limitation applicable tax withholdings, (ii) any pre-tax elective deferrals under the 401(k) Plan, and (iii) any amounts to be deferred by the Participant in order to participate in any other benefit programs maintained by the Company.

(b) A Deferred Salary Election with respect to Base Salary for a particular calendar year must be made during the Annual Open Enrollment Period and shall be effective as of the next January 1. Once a Deferred Salary Election is made, it shall be irrevocable after the final deadline established by the Committee for making the election. Such Deferred Salary shall be credited to the Participant's Deferred Salary Account on the first business day following (or as soon as reasonably practicable thereafter) after the payroll period from which it has been deducted.

Section 3.2 Deferred Bonus Election.

(a) Each Participant may elect to make a Deferred Bonus Election with respect to any Bonus that would be paid for the Plan Year following the year of the Participant's Deferred Bonus Election. A Participant may elect to defer from 1% to 100% of the Participant's Bonus (in increments of 1%). Notwithstanding the foregoing, any Deferred Bonus Election must be made (or if not made will be construed) in a manner that will ensure that the Participant is paid a sufficient amount that will allow adequate amounts available for (i) satisfaction of all required withholdings, including without limitation applicable tax withholdings, (ii) any pre-tax elective deferrals under the 401(k) Plan, if applicable, and (iii) any amounts to be deferred by the Participant in order to participate in any other benefit programs maintained by the Company, if applicable.

(b) A Deferred Bonus Election with respect to a Bonus for a particular Plan Year must be made during the Annual Open Enrollment Period preceding the Plan Year in which the performance giving rise to the Bonus payment occurs. Once a Deferred Bonus Election is made, it shall be irrevocable after the final deadline established by the Committee for making the election. Such deferral shall be credited to the

Participant's Deferred Bonus Account on the first business day (or as soon as practicable thereafter) following the date the Bonus is paid.

Section 3.3 Company Matching Credits.

(a) Subject to all of the requirements of this Section 3.3, if a Participant has made a Deferred Salary Election in accordance with Section 3.1 or a Deferred Bonus Election in accordance with Section 3.2, and the Participant has not received for that Plan Year the maximum available matching contribution available under the 401(k) Plan for that Plan Year solely as a result of a reduction in his/her Compensation (as defined in the 401(k) Plan) below the maximum limit established at Section 401(a)(17) of the Code because of deferrals made to this Plan, then the Company shall allocate a Company Matching Credit to the Plan for that Plan Year in an amount equal to the difference between the maximum matching contribution that would have been available (but for the reduction described above) for the Plan Year reduced by the actual amount of matching contribution for that Plan Year made to the 401(k) Plan on that Participant's behalf. To be eligible for a Company Matching Credit under this Plan a Participant must have (i) made a deferral to the 401(k) Plan up to the limit established at Code Section 402(g), (ii) contributed the maximum amount of catch-up contribution to the 401(k) Plan available under Code Section 414(v)(2)(B)(i) for such Plan Year (if applicable) and (iii) been employed by the Company as of the last day of the Plan Year.

(b) Company Matching Credits under Section 3.3(a) shall be credited to the Participant's Company Matching Credit Account as soon as practicable as determined by the Committee on an annual basis.

ARTICLE IV

Participants' Accounts

Section 4.1 Crediting of Employee Deferrals and Company Matching Credits.

Deferrals to this Plan that are made under Article III shall be credited to the Participant's Accounts in accordance with such rules established by the Committee from time to time.

Section 4.2 Investment Elections.

A Participant may generally direct the Committee with respect to the Participant's intentions for investments of any amounts credited under the Plan, in accordance with rules and investment selections determined by the Committee. Participants' Investment Elections with respect to amounts credited hereunder shall be made pursuant to the written, telephonic or electronic methods prescribed by the Committee and subject to such rules on Investment Elections and Investment Options as established by the Committee from time to time.

Section 4.3 Hypothetical Earnings.

Except as otherwise provided herein, additional hypothetical bookkeeping amounts shall be credited to (or deducted from) a Participant's Accounts to reflect the earnings (or losses) that would have been experienced had the deferred amounts been invested in the investment options identified by the Participant in Section 4.2.

Section 4.4 Vesting.

At all times a Participant shall be fully vested in all of his or her Accounts.

Section 4.5 Account Statements.

Account statements will be posted online for participants on a quarterly basis or on such regularly scheduled as the Committee deems appropriate. Paper copies will be available upon request.

ARTICLE V
Distributions

Section 5.1 Timing of Distributions.

The following are valid distribution events:

- (a) Separation from Service;
- (b) An In-Service Withdrawal;
- (c) A Change in Control;
- (d) Disability;
- (e) Death; or
- (f) Unforeseeable Emergency.

Section 5.2 Form of and Other Rules For Distributions.

(a) General Rules. A Participant must designate the timing and form of distributions for all amounts allocated to his or her Accounts for each Plan Year, in accordance with Section 2.2(b). Participants who fail to specify a time of distribution will in all cases have his or her Accounts distributed under Section 5.2(b) in the form of a lump sum distribution.

(b) Distributions on Separation from Service. A Participant may elect to receive a distribution on Separation from Service in the form of a single lump sum payment or in installments over a period of not less than two (2) nor more than ten (10) years.

(i) All payments on a Separation from Service shall be made or, with respect to installment payments shall commence, as soon as administratively practicable coincident with or next following the date that is six (6) months from the date of the Separation from Service. Ongoing installment payments, if elected, shall then be made on each anniversary (or nearest business day practicable) of the date the first payment is made for the installment period. The following example is provided for illustrative purposes only: Employee A has elected to have his entire Account balance distributed in the form of a lump sum payment on his Separation from Service. He Separates from Services on June 30, 2017. His lump sum payment will be distributed to him, net of all taxes and withholdings, on January 2, 2018.

(ii) Notwithstanding anything contained herein or on any Participant's election form, Participants who have elected to receive payment on their Separation from Service with Account balances of less than \$100,000 on the date of their Separation from Service shall have their Account balance distributed to them in the form of a lump sum distribution as soon as administratively practicable coincident with or next following the date that is six (6) months from the date of the

Separation from Service; to avoid doubt, the requirements of this subsection (b)(ii) shall only apply with respect to amounts a Participant has elected to receive on a Separation from Service in accordance with this Section 5(b) and shall not apply to payments being made in accordance with any other section of this Plan, including without limitation Section 5(c).

(c) In-Service Withdrawal. A Participant may elect to receive (or commence to receive) a distribution during a specified month and year while actively employed by the Company (an “in-service withdrawal”). In-service withdrawal amounts will be distributed on the first business day (or nearest business day practicable) of the month and year selected by the Participant. The date of the in-service withdrawal may not be a date that is earlier than the second Plan Year following the Plan Year with respect to which such amount was allocated to a Participant’s Account. To avoid doubt and for illustrative purposes only, an amount allocated under this Plan for the 2015 Plan Year may first be eligible for in-service withdrawal in 2017. In-service withdrawals may be distributed in the form of a single lump sum or in installment payments of from two (2) to five (5) years, with installment payments commencing with the first business day (or nearest business day practicable) of the month and year selected and then continuing annually for the elected period on the anniversary (or nearest business day practicable) of the initial installment payment.

(d) Distributions on a Change in Control. Notwithstanding any election by a Participant to the contrary, amounts allocated to a Participant’s Account shall be distributed in the form of single lump sum payment upon the occurrence of a Change in Control; provided that, the foregoing shall not apply to any amounts then currently being distributed to a Participant in installment payments, which shall continue to be distributed in accordance with their originally elected schedule. Lump sum payments upon a Change in Control shall be made on or as soon as administratively practicable following the closing date of the transaction that constitutes the Change in Control.

(e) Distribution on Death.

Notwithstanding any election by the Participant to the contrary, if a Participant dies before the distribution of the Participant’s Accounts, unless the Participant had commenced receiving installment payments, as soon as practicable following the end of the calendar quarter in which the date of death occurs, amounts credited to the Participant’s Accounts shall be paid in a single lump sum payment to the Participant’s Beneficiary (or Beneficiaries). In the absence of any Beneficiary designation, payment shall be made to the personal representative, executor or administrator of the Participant’s estate. Beneficiary designations may be changed by a Participant at any time without the consent of the Participant’s Spouse or any prior Beneficiary. If the Participant dies after having commenced to receive installment payments, the Participant’s Account shall be distributed to the Participant’s Beneficiary, Beneficiaries or estate (as the case may be, in accordance with the above), as said payments become due under the scheduled distribution option elected by the Participant.

(f) Distribution on Disability.

Notwithstanding any election by the Participant to the contrary, if a Participant is determined to be Disabled before the distribution of the Participant’s Accounts, unless the Participant had commenced receiving installment payments, as soon as practicable following the end of the calendar quarter in which the Disability is determined, amounts credited to the Participant’s Accounts shall be paid in a single lump sum payment to the Participant. If the Participant becomes Disabled after having commenced to receive installment payments, the Participant’s Account shall be distributed to the Participant as said payments become due under the scheduled distribution option elected by the Participant.

(g) Distribution on Unforeseeable Emergency. At any time prior to the time an amount is otherwise payable hereunder, an active Participant may request a distribution of all or a portion of any vested amounts credited to the Participant's Accounts on account of the Participant's Unforeseeable Emergency, subject to the following requirements:

(i) Such distribution shall be made, in the sole discretion of the Committee, if the Participant has incurred an Unforeseeable Emergency. The Committee shall consider any requests for payment under this section in accordance with the standards of interpretation described in Code Section 409A and the regulations and other guidance thereunder. If an Unforeseeable Emergency request is received and approved, a Participant's deferral elections for the Plan Year in which the request has been made will be suspended but only to the extent permitted under Code Section 409A.

(ii) Whether a Participant is faced with an Unforeseeable Emergency will be determined based on the relevant facts and circumstances of each case and be based on the information supplied by the Participant, in writing, pursuant to the procedure prescribed by the Committee. In addition to and without limiting the foregoing, distributions under this subsection shall not be allowed for purposes of sending a child to college or the Participant's desire to purchase a home or other residence. In all events, distributions made on account of an unforeseeable emergency are limited to the extent reasonably needed to satisfy the emergency need (which may include amounts necessary to pay any federal, state, local, or foreign income taxes or penalties reasonably anticipated to result from the distribution).

(iii) Notwithstanding the foregoing, distribution on account of an Unforeseeable Emergency under this subsection may not be made to the extent that such emergency is or may be relieved:

(A) through reimbursement or compensation by insurance or otherwise,

(B) by liquidation of the Participant's assets, to the extent the liquidation of such assets would not itself cause severe financial hardship, or

(C) by cessation of deferrals under the Plan.

(iv) All distributions under this subsection shall be made in cash as soon as practicable after the Committee has approved the distribution and that the requirements of this subsection have been met.

(h) Change in Form or Timing of Distribution.

In any case where a Participant wishes to change a form of distribution from what was previously in effect with respect to any amounts credited to a Participant's Account:

(i) The election will not take effect until at least twelve months after the date on which the election is made and will not be recognized with respect to payments that would otherwise have commenced during such twelve-month period;

(ii) The payment with respect to which such election is made (or the first payment, in the case of installment payments) shall be deferred for a period of not less than five years from the date such payment would otherwise have been made; and

(iii) Any election may not be made less than twelve months prior to the date on which such payments would otherwise have commenced.

ARTICLE VI

General Provisions

Section 6.1 Unsecured Promise to Pay.

The Company shall make no provision for the funding of any amounts payable hereunder that (i) would cause the Plan to be a funded plan for purposes of Section 404(a)(5) of the Code, or Title I of ERISA, or (ii) would cause the Plan to be other than an “unfunded and unsecured promise to pay money or other property in the future” under Treasury Regulations § 1.83-3(e); and the Company shall have no obligation to make any arrangement for the accumulation of funds to pay any amounts under this Plan. Subject to the restrictions of the preceding sentence and in Section 6.2, the Company, in its sole discretion, may establish one or more grantor trusts described in Treasury Regulations § 1.677(a)-1(d) to accumulate funds to pay amounts under this Plan, provided that the assets of such trust(s) shall be required to be used to satisfy the claims of the Company’s general creditors in the event of the Company’s bankruptcy or insolvency.

Section 6.2 Plan Unfunded.

In the event that the Company shall decide to establish an advance accrual reserve on its books against the future expense of payments hereunder, such reserve shall not under any circumstances be deemed to be an asset of this Plan but, at all times, shall remain a part of the general assets of the Company, subject to claims of the Company’s (or such subsidiary’s) creditors. A person entitled to any amount under this Plan shall be a general unsecured creditor of the Company with respect to such amount. Furthermore, a person entitled to a payment or distribution with respect to any amounts credited to Participant Accounts shall have a claim upon the Company only to the extent of the vested balance(s) credited to such Accounts.

Section 6.3 Expenses.

All commissions, fees and expenses that may be incurred in operating the Plan and any related trust(s) established in accordance with the Plan will be paid by the Company.

Section 6.4 Non-Assignability.

Participants, their legal representatives and their Beneficiaries shall have no right to anticipate, alienate, sell, assign, transfer, pledge or encumber their interests in the Plan, nor shall such interests be subject to attachment, garnishment, levy or execution by or on behalf of creditors of the Participants or of their Beneficiaries.

Section 6.5 Employment/Participation Rights.

(a) Nothing in the Plan shall interfere with or limit in any way the right of the Company to terminate any Participant’s employment at any time, nor confer upon any Participant any right to continue in the employ of the Company.

(b) Nothing in the Plan shall be construed to be evidence of any agreement or understanding, express or implied, that the Company will continue to employ a Participant in any particular position or at any particular rate of remuneration.

(c) No employee shall have a right to be selected as a Participant, or, having been so selected, to be continued as a Participant.

(d) Nothing in this Plan shall affect the right of a recipient to participate in and receive benefits under and in accordance with any pension, profit-sharing, deferred compensation or other benefit plan or program of the Company.

Section 6.6 Severability.

If any particular provision of the Plan shall be found to be illegal or unenforceable for any reason, the illegality or lack of enforceability of such provision shall not affect the remaining provisions of the Plan, and the Plan shall be construed and enforced as if the illegal or unenforceable provision had not been included.

Section 6.7 No Individual Liability.

It is declared to be the express purpose and intention of the Plan that no liability whatsoever shall attach to or be incurred by the shareholders, officers, or directors of the Company (or any affiliate) or any representative appointed hereunder by the Company (or any affiliate), under or by reason of any of the terms or conditions of the Plan.

Section 6.8 Tax and Other Withholding.

The Company shall have the right to deduct from any deferral or contribution to or payment made under the Plan any amount required by federal, state, local, or foreign law to be withheld with respect to such payment. The Company shall also have the right to withhold from other current salary or wages any amount required by federal, state, local, or foreign law to be withheld with respect to compensation deferred under the Plan at any time prior to payment of such deferred compensation, or if such other current salary or wages are insufficient to satisfy such withholding requirement, to require the Participant to pay the Company such amount required to be withheld to the extent such requirement cannot be satisfied through withholding on other current salary or wages. Additionally, should deferrals under this Plan cause there to be insufficient current salary or wages for purposes of withholding taxes or other amounts required by federal, state, local, or foreign law to be withheld from current salary or wages, the Company shall require the Participant to pay the Company such amount required to be withheld to the extent such requirement cannot be satisfied through withholding on other current salary or wages. Amounts deferred under the Plan will be taken into account for purposes of any withholding obligation under the Federal Insurance Contributions Act and Federal Unemployment Tax Act at the later of the Plan Year during which the services are performed or the Plan Year during which the rights to the amounts are no longer subject to a substantial risk of forfeiture, as required by Section 3121(v) and 3306(r) of the Code and the regulations promulgated thereunder.

Section 6.9 Applicable Law.

This Plan shall be governed by and construed in accordance with the laws of the Commonwealth of Massachusetts except to the extent governed by applicable federal law.

Section 6.10 Incompetency.

Any person receiving or claiming benefits under the Plan shall be conclusively presumed to be mentally competent and of age until the Committee receives written notice, in a form and manner acceptable to it, that such person is incompetent or a minor, and that a guardian, conservator, or other person legally vested with the care of his estate has been appointed. If the Committee finds that any person to whom a

benefit is payable under the Plan is unable to properly care for his or her affairs, or is a minor, then any payment due (unless a prior claim therefor shall have been made by a duly appointed legal representative) may be paid to the Spouse, a child, a parent, or a brother or sister, or to any person deemed by the Committee to have incurred expense for the care of such person otherwise entitled to payment. If a guardian or conservator of the estate of any person receiving or claiming benefits under the Plan shall be appointed by a court of competent jurisdiction, payments shall be made to such guardian or conservator provided that proper proof of appointment is furnished in a form and manner suitable to the Committee. Any payment made under the provisions of this Section shall be a complete discharge of liability therefor under the Plan.

Section 6.11 Notice of Address.

Any payment made to a Participant or a designated Beneficiary at the last known post office address of the distributee on file with the Committee, shall constitute a complete acquittance and discharge of any obligations of the Company under this Plan, unless the Committee shall have received prior written notice of any change in the condition or status of the distributee. Neither the Committee, the Company nor any director, officer, or employee of the Company shall have any duty or obligation to search for or ascertain the whereabouts of a Participant or a designated Beneficiary.

ARTICLE VII **Administration**

Section 7.1 Committee.

The Plan shall be administered by the Committee. The Committee shall have the exclusive right to interpret the Plan (including questions of construction and interpretation) and the decisions, actions and records of the Committee shall be conclusive and binding upon the Company and all persons having or claiming to have any right or interest in or under the Plan. The Committee may delegate to such officers, employees or departments of the Company (and/or a committee thereof), or to service-providers or other persons, such authority, duties, and responsibilities of the Committee as it, in its sole discretion, considers necessary or appropriate for the proper and efficient operation of the Plan, including, without limitation, (i) interpretation of the Plan, (ii) approval and payment of claims, and (iii) establishment of procedures for administration of the Plan.

Section 7.2 Claims Procedure.

Any person dissatisfied with the Committee's determination of a claim for benefits (or claim for eligibility for participation) hereunder must file a written request for reconsideration with the Committee. This request must include a written explanation setting forth the specific reasons for such reconsideration. The Committee shall review its determination promptly and render a written decision with respect to the claim, setting forth the specific reasons for such denial written in a manner calculated to be understood by the claimant. Such claimant shall be given a reasonable time within which to comment, in writing, to the Committee with respect to such explanation. The Committee shall review its determination promptly and render a written decision with respect to the claim. The Committee shall have the fullest discretion available under law to make all determinations and such determinations of the Committee shall be conclusive, binding, and final upon all claimants under this Plan.

Section 7.3 Plan to Comply With Code Section 409A.

Notwithstanding any provision to the contrary in this Plan, each provision in this Plan shall be interpreted to permit the deferral of compensation in accordance with Code Section 409A and any provision

that would conflict with such requirements shall not be valid or enforceable. Any distribution required to be made “as soon as reasonably” practicable shall be made in all cases by the end of the Plan Year in which such distribution is to be made and in no event shall any Participant have any discretion or control as to the timing of such payment.

ARTICLE VIII
Amendment, Termination and Effective Date

Section 8.1 Amendment of the Plan.

Subject to Section 8.3, the Plan may be wholly or partially amended or otherwise modified at any time by written action of the Board. Notwithstanding the foregoing, the Board hereby grants to the Committee the authority to approve and adopt amendments to the Plan, provided that such amendments will not materially increase the Company’s costs related to providing benefits under the Plan or materially affect the benefits of participants in the Plan.

Section 8.2 Termination of the Plan.

Subject to the provisions of Section 8.3, the Plan may be terminated at any time by written action of the Board.

Section 8.3 No Impairment of Benefits.

Notwithstanding the provisions of Sections 8.1 and 8.2, no amendment to or termination of the Plan shall reduce the amount credited to any Participant’s Accounts hereunder.

Section 8.4 Effective Date.

The Plan as set forth herein is effective as of January 1, 2015.

Exhibit I

In accordance with Sections 1.3 or 1.6 of this Plan, the following are not included in the definition of Base Salary or Bonus for purposes of this Plan and any deferral election shall not be applicable to them:

1. Amounts deferred under this Plan, the 401(k) Plan or any other amounts deferred to any employee benefit or fringe benefit plan and not included in the income of the employee;
2. Income related to equity grants and stock proceeds;
3. Sales Incentive Compensation, including “Incentive Compensation”, “Bonuses”, “Guaranteed Incentive”, “Recoverable Guaranteed Incentive”, “SPIFFs”, and “One-Time Payments” each as defined in the Incentive Compensation Plan;
4. One-time, non-recurring bonus payments including without limitation any sign-on bonus, referral bonus, on-call bonus, spot awards, patent awards, transition bonus, or event bonus;
5. Overtime or Holiday Pay;
6. Shift Differentials;
7. Income coded as Paid Leave;
8. Imputed income or other income related to taxable fringe benefits;
9. Allowances;
10. Severance, Separation Pay, and Pay in Lieu of Notice;
11. Any other income that cannot be reasonably considered “Base Pay” or “Bonus” as determined by the Committee, in its sole discretion.

CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, F. Thomson Leighton, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of Akamai Technologies, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
